UGC's Biannual Admission System

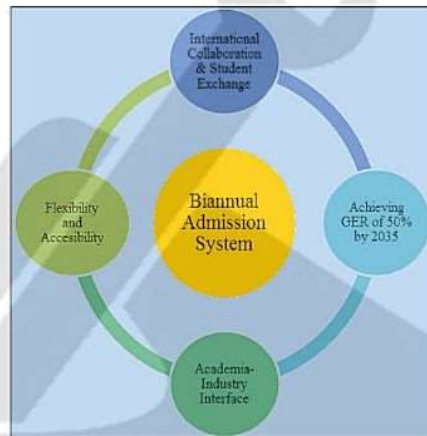

Aligning India's Higher Education with Global Benchmarks

Dr. Rajesh Kumar

The University Grants Commission (UGC) has recently introduced biannual admissions for Indian universities and institutions, marking a significant transition towards a more adaptable and accessible higher education framework. This reform is designed not only to meet national educational needs but also to align with global academic standards. In line with the National Education Policy (NEP) 2020, this initiative aims to simplify the admission process by offering students two opportunities annually: one starting in July-August and another in January-February, across various programmes including undergraduate, postgraduate, and doctoral studies. This shift replaces the previous practice of a single academic session beginning each year in July-August.

Highlighting the importance of biannual admission system, UGC Chairman Prof. M Jagadesh Kumar mentioned that the initiative will benefit many students who miss admission opportunities to a university/institution in the July-August session due to various reasons such as health related problems, delay in announcement of board exam results, or other personal issues.

It's worth noting that the UGC has already implemented biannual admissions for Open and Distance Learning (ODL) and online programmes, demonstrating significant benefits. This approach has enabled nearly half a million students to enroll in degree programmes without having to wait for a full academic year. According to UGC's Distance Education Bureau (DEB) Portal, approximately 19.73 lakh students enrolled in the July 2022 admission

cycle, with an additional 4.28 lakh students enrolling in various academic programmes during the January 2023 cycle through ODL and online channels.

Biannual admissions provide students, who are left behind in the first round of admissions, the opportunity to save a full year and expedite their academic progress and seize more opportunities within their educational journey. This proactive approach not only facilitates timely advancement in education but also broadens access to

higher education, effectively meeting the evolving needs and aspirations of students. It underscores a commitment to adaptability and responsiveness in the educational sector, ensuring that students can maximise their potential without unnecessary delays.

Gross Enrolment Ratio as per Mandate of NEP 2020

The Association of Indian Universities (AIU) Research Report 2020 highlights that India's Gross Enrolment Ratio (GER) in higher education stands at 26.3%, significantly lower than the global average of 36.7%. This figure pales in comparison to developed nations such as the USA (88.2%), Germany (70.3%), and the UK (60%), as well as emerging economies like Brazil (51.3%) and China (49.1%). Addressing this disparity, the National Education Policy (NEP) 2020 has set an ambitious target to elevate India's GER to 50% by 2035, aligning with international educational benchmarks.

UGC Chairman Prof. M Jagadesh Kumar asserts that implementing a biannual admission system could substantially bolster the GER in higher education. This reform is envisioned not only to attract more students but also to position India as a global hub for academic pursuits, in accordance with the NEP 2020's vision. By offering admissions in two cycles, starting in July-August and January-February, the initiative aims to eliminate barriers that might deter students from pursuing higher education, thereby fostering greater participation.

Advancing Knowledge, Shaping Policy Thrust on Arctic and Polar Studies

Ranjana Singh

In an era where global environmental changes are becoming increasingly consequential, the University Grants Commission (UGC) of India has taken a significant step by launching two Massive Open Online Courses (MOOCs) on Arctic and Polar Studies. These courses, now available for registration on the SWAYAM platform, are not only a boon for academic enrichment but also align with India's broader Arctic policy. Let's delve into the specifics of these courses and their strategic importance for India.

The Courses at a Glance

1. Understanding the Arctic: Climate and Environmental Protection

2. Polar Science, Arctic Governance, Policy, and Law

Both courses are elective, 15-week-long programmes that begin in July and conclude in

October, with exams scheduled for mid-December. These courses are designed to be credit-eligible, allowing universities the flexibility to integrate them into their curricula.

Aligning with India's Arctic Policy

India's engagement with the Arctic is framed by its Arctic

Policy, which is built on six pillars:

1. Science and Research
2. Climate and Environmental Protection
3. Economic and Human Development
4. Transportation and Connectivity
5. Governance and International Cooperation
6. National Capacity Building

The UGC's new courses are a reflection of these pillars, particularly focussing on climate change, environmental protection, governance, and policy. This educational initiative underscores India's commitment to contributing to global Arctic research and sustainable development.

Importance of Arctic Studies

The Arctic region plays a crucial role in global climate regulation. Its changing weather patterns have far-reaching impacts, influencing everything

R&D IN INDIA

INNOVATIONS
UNLOCKED

The aviation industry, a vital driver of global connectivity, faces a significant challenge - its dependence on fossil fuels and the environmental impact it creates. Indian Institute of Petroleum (IIP), a constituent

laboratory of the Council of Scientific and Industrial Research (CSIR), has pioneered the development of indigenous bio-jet fuel technology to address this challenge. This revolutionary technological innovation promises a greener future for aviation, reducing air pollution and contributing to India's net-zero emission goals.

Milestones in Bio-Jet Fuel Innovation

CSIR-IIP's journey with bio-jet fuel began with a historic event - India's first-ever biofuel-powered flight in 2018. Taking off from Dehradun to Delhi, this flight utilised bio-jet fuel produced by CSIR-IIP's patented technology using *Jatropha* oil. This marked a significant milestone, showcasing the potential of sustainable alternatives to conventional aircraft fuels.

The success story continued, with the support of the Indian Air Force (IAF), and, in a first-of-its-kind operation, an IAF AN-32 aircraft, powered by a 10% blend of CSIR-IIP's bio-jet fuel, conducted a flight at Leh, one of the world's highest airports. This rigorous test under extreme conditions demonstrated the fuel's viability in real-world scenarios.

After these successful trials, CSIR's bio-jet fuel technology was formally approved for use in IAF aircraft. This certification, a testament to years of research and testing, signifies India's growing confidence in its bio-aviation sector. It aligns perfectly with the vision of 'Atmanirbhar Bharat,' promoting self-reliance in critical technologies.

Striving for Global Recognition

CSIR is actively pursuing international certification for its

bio-jet fuel, a critical step for its adoption in commercial aviation. This international recognition will pave the way for commercial airlines to embrace Sustainable Aviation Fuel (SAF) and reduce their carbon footprint.

The Ingenious Science behind CSIR'S Bio-Jet Fuel

Unlike conventional jet fuel derived from petroleum, this biofuel is produced from renewable sources like used cooking oil, tree-borne oils, and short-gestation oilseed crops cultivated by farmers during off-

seasons. This not only promotes environmental sustainability but also empowers farmers and tribal communities involved in the production and collection of these non-edible oils. Compared to conventional jet fuel, CSIR's bio jet fuel boasts an ultra-low sulfur content, significantly reducing air pollution. This aligns with India's ambitious goal of achieving net-zero greenhouse gas emissions, contributing to a cleaner and healthier planet.

The development of this technology involved extensive research and meticulous testing. To ensure the bio-jet fuel meets stringent international aviation safety standards, CSIR-IIP collaborated with various agencies, like Indian Oil Corporation (IOCL), and Hindustan Aeronautics Ltd. (HAL). Rigorous ground and in-flight tests assessed performance, reliability, and impact on aircraft operations.

The successful development and certification of CSIR's bio-jet fuel technology marks a significant achievement for Indian science and technology. It demonstrates India's commitment to sustainable aviation and positions the country as a leader in developing innovative solutions for a greener future. This indigenous technology has the potential to revolutionise the aviation industry, paving the way for cleaner skies and a sustainable future for air travel.

Economic Opportunities and Employment Generation

Beyond environmental benefits, CSIR's bio-jet fuel technology offers significant economic benefits. The commercial production of SAF will create new job opportunities

Taking Flight on Green Wings Bio-Jet Fuel for a Sustainable Future

INTERVIEW

Dr. Harender Singh Bisht
Director, CSIR-Indian Institute of Petroleum

Q: Please elaborate on the process and key innovations that led to the indigenous development of bio-jet fuel technology at CSIR-IIP.

A: CSIR-Indian Institute of Petroleum, Dehradun, has developed a single-step process to convert lipids (plant-derived oil and animal-derived fats) into hydrocarbons using a unique patented catalyst composition. It is a single-reactor Hydroprocessed Esters and Fatty Acids (HEFA) process, similar to the two-step HEFA process, except that the product contains the required aromatics.

The highlights of the CSIR-IIP process are mentioned below:

- Single-step catalytic HEFA process
- High feed flexibility, suitable for multiple feedstocks
- SAF yields upto 55%
- Composition similar to ATF having cyclic paraffin, paraffin, and aromatics of C7 to C15 Carbons
- Patented non-noble metal-based catalyst
- General usage authorisation for the Indian Air Force (Provisional Clearance Certificate issued by CEMILAC subject to OEM concurrence)
- 1TPD plant installed in Gujarat for green diesel production
- The demo plant of 9000TPA SAF will be ready by 2027 at MRPL, Mangalore

Q: What are the main challenges and strategies involved in scaling up the production of bio-jet fuel to meet the demands of the aviation industry?

A: The two major challenges involved in the scale-up of the process are the pre-treatment of the feedstock and the sustainable supply of the feed at a commercial scale. Vegetable oils contain a significant amount (300-500 PPM) of impurities like metals and chlorides, which must be removed entirely before converting into bio-jet fuel to maintain catalyst life. The technical challenge was overcome with our in-house developed pre-treatment process. The in-house developed process achieved a total metal reduction of less than <10PPM. The feed oil contains metals 200-300 PPM. Feedstock supply is another major challenge. CSIR-IIP is working with an NGO in Dehradun to collect UCO and a few other suppliers to collect non-edible vegetable oil. The feed is used in a pilot plant facility in Dehradun. A survey of the feedstock supply chain is being conducted for commercial plants.

Q: How is CSIR-IIP addressing the challenge of developing a sustainable and robust supply chain for bio-jet fuel feedstocks, particularly regarding the cultivation of non-food crops on marginal lands?

A: CSIR-IIP is involved with one of the NGOs (SDC Foundation) in field surveys identifying UCO suppliers in Uttarakhand region with the commercial plant feedstock requirement target. Once the quantity is established in the Uttarakhand region, a similar approach would be used to cover major cities in India. Suppliers will be identified to confirm the stable feedstock supply for commercial-scale plants. The minimum price availability of the feedstock would be included in the survey. CSIR-IIP is also involved in cultivating Brassica Carinata (Ethiopian mustard) as a short rotation crop. The seed and oil yield based on the cultivation is being evaluated.

across various sectors. Farmers can cultivate the oilseeds, boosting their income and promoting rural development. New production facilities will be required to convert the feedstock into bio-jet fuel, generating additional employment.

Challenges

As the technology matures and production ramps up, India will become a major exporter of bio-jet fuel. This would not only strengthen the domestic economy but would also position India as a leader in the global SAF market. However, several challenges need to be overcome to realise this dream, such as sustainable feedstock supply and investment in setting up new facilities.

Establishing a robust and sustainable supply chain for feedstock is crucial for large-scale bio-jet fuel production. A major challenge is identifying and cultivating suitable oilseed crops that can be grown on marginal lands without impacting food security or causing deforestation. As *Jatropha*, the feedstock used in initial trials, faced criticism for its potential to compete with food production, CSIR is actively exploring alternative feedstocks like used cooking oil, tree-borne oils, and

short-gestation oilseed crops that can be integrated into existing agricultural practices.

Another critical challenge is cost reduction. Bio-jet fuel currently remains more expensive than conventional jet fuel. Optimising production processes to improve efficiency and yield is essential for making bio-jet fuel commercially competitive. Advancements in feedstock cultivation, conversion technologies, and fuel refining are key to reducing production costs and making bio-jet fuel a viable option.

Continued Innovation

CSIR's scientists are constantly striving to improve the efficiency and cost-effectiveness of bio-jet fuel production. Research efforts are focused on several key areas:

- **Developing new feedstock options:** Identifying and evaluating alternative sources of sustainable biomass, such as algae or dedicated energy crops, which can potentially offer higher yields and lower environmental impact.
- **Exploring alternative conversion technologies:** There is a need for new methods for converting agriculture and forest residue biomass into

bio-jet fuel. This may involve exploring advanced techniques like hydrothermal liquefaction or gasification, which offer the potential for increased efficiency and flexibility in feedstock selection.

- **Optimising existing processes:** CSIR scientists are finding ways of refining current production methods to improve conversion rates, reduce waste generation, and ultimately reduce production costs.

Educating for Change

To achieve widespread adoption of bio-jet fuels, public awareness campaigns are essential. Educating flyers and stakeholders about the environmental benefits of sustainable aviation fuels (SAF) will encourage them to support airlines that embrace this technology. Additionally, information can be disseminated on how passengers can contribute by choosing airlines that offer SAF options or participating in carbon offset programmes that utilise bio-jet fuel.

Advancing Knowledge, Shaping Policy ...

from monsoon cycles in South Asia to rising sea levels worldwide. By understanding these dynamics, Indian researchers and policymakers can better anticipate and mitigate the effects of climate change domestically and globally.

Enhancing National and International Collaboration: One of the core objectives of these MOOCs is to enhance India's capacity for international cooperation in Arctic matters. By educating the next generation of scientists, lawyers, and policymakers on Arctic issues, India can foster more robust collaborations with Arctic nations and contribute to global governance frameworks.

Benefits for Students and Academia: For students, these MOOCs offer an unprecedented opportunity to gain specialised knowledge in a field of growing importance. The courses are accessible through the SWAYAM platform, ensuring wide availability. The integration of these courses into university curricula means that students from diverse disciplines can benefit, whether they are studying environmental science, international relations, law, or any related field.

The launch of these MOOCs by the UGC is a forward-thinking move that positions India as a proactive participant in global Arctic discourse. By educating its youth on critical Arctic issues, India is not only fostering a generation of informed citizens but also reinforcing its strategic and scientific presence in the Arctic region.

Is This Programme For You?

It's a good fit if you study:

- Biology
- Environmental Science
- International Relations
- Law
- Geography
- Economics
- Chemistry
- Geology

Let's delve deeper into each subject to understand how the MOOCs on Arctic and Polar Studies at the UGC can be a valuable addition to various academic fields:

Biology

The Arctic is home to some of the most unique and resilient ecosystems on Earth. Studying biology within this context will allow you to explore:

Adaptations of Flora and Fauna: Learn how species have evolved to survive extreme cold, with examples ranging from polar bears and arctic foxes to algae and lichens.

Biodiversity and Conservation: Understand the biodiversity hotspots in the Arctic and the conservation strategies necessary to protect them. This includes studying endemic species and their ecological niches.

Impact of Climate Change: Investigate how rising temperatures are affecting Arctic biodiversity, with a focus on species migration, habitat loss, and the phenology of plant and animal life cycles.

Environmental Science

For those pursuing environmental science, this programme will enhance your understanding of:

Climate Change Dynamics: Study the latest research on how the Arctic is warming twice as fast as the global average and the consequent effects on global climate systems.

Sustainable Practices: Explore environmental protection strategies specific to the Arctic, including pollution control, habitat restoration, and sustainable resource management.

Innovative Technologies: Learn about cutting-edge technologies used in Arctic

research, such as remote sensing, satellite imaging, and advanced modelling techniques for climate prediction.

International Relations

International relations students will find value in:

Arctic Governance Structures: Examine the roles of international bodies such as the Arctic Council, the United Nations Convention on the Law of the Sea (UNCLOS), and bilateral agreements between Arctic nations.

Geopolitical Dynamics: Analyse the geopolitical interests and territorial claims in the Arctic, focussing on how these dynamics influence global politics and international law.

Collaborative Frameworks: Study successful international cooperation models in the Arctic, emphasising the importance of diplomacy, conflict resolution, and sustainable development agreements.

Law

Law students can delve into:

Legal Frameworks: Explore the key legal instruments governing the Arctic, including treaties, conventions, and national legislation that address sovereignty, maritime boundaries, and environmental protection.

Dispute Resolution: Understand the mechanisms for resolving disputes over territorial claims and resource rights in the Arctic, with a focus on arbitration and international courts.

Indigenous Rights: Study the legal rights of indigenous communities in the Arctic, their role in governance, and how international law protects their traditional knowledge and lands.

Geography

Geography students will benefit from:

Physical Features and Climate Patterns: Examine the physical geography of the Arctic, including its topography, sea ice dynamics, and glacial systems. Understand how these features influence global weather and climate patterns.

Geospatial Analysis: Learn to use Geographic Information Systems (GIS) and remote sensing tools to analyse Arctic data, map environmental changes, and predict future trends.

Impact on Global Systems: Study the interconnectedness of Arctic changes with global systems, such as ocean currents, rise in sea level, and the carbon cycle.

Economics

For economics students, the course will provide insights into:

Resource Economics: Explore the economic potential of Arctic resources, including oil, gas, minerals, and fisheries, and the challenges of balancing exploitation with sustainability.

Sustainable Development: Investigate strategies for sustainable development in the Arctic, focussing on economic diversification, green technologies, and the promotion of renewable energy.

Economic Policies and Impacts: Analyse how different countries' economic policies affect the Arctic region, including trade routes, infrastructure development, and economic partnerships.

Chemistry and Geology

The Arctic, with its vast icy expanses and unique ecosystems, serves as an unparalleled natural laboratory. For students of chemistry and geology, the study of Polar Regions offers a plethora of opportunities to deepen their understanding of natural processes and global systems. Here's how diving into Arctic and polar studies can significantly benefit students in these fields.

Atmospheric Chemistry: The polar regions are crucial for studying atmospheric chemistry. The unique conditions in the Arctic allow for the examination of chemical reactions that do not occur elsewhere. For instance, the phenomenon of polar stratospheric clouds plays a critical role in ozone depletion, which is essential for students to understand the chemistry of our atmosphere.

Climate Change Indicators: Ice cores drilled from glaciers and ice sheets contain trapped air bubbles that serve as time capsules, preserving atmospheric composition from thousands of years ago. By analysing these cores, chemistry students can study the historical concentrations of greenhouse gases like carbon dioxide and methane, providing insights into past climate conditions and helping predict future climate scenarios.

Ocean Chemistry: The Arctic Ocean is a pivotal area for studying marine chemistry. It provides a unique environment to investigate the interactions between seawater and sea ice, including the processes of salt rejection and nutrient cycling. These studies are essential for understanding the global carbon cycle and the role of the oceans in regulating Earth's climate.

Tectonic Activity: The polar regions, particularly Antarctica, are key areas for studying tectonic activity. The movement of tectonic plates in these areas can reveal much about the Earth's geological history. For example, studying the geology of Greenland and Antarctica can provide evidence of past continental drift and the formation of supercontinents like Pangaea.

Glaciology: Glaciers and ice sheets are dynamic geological features that significantly influence Earth's landscape. By studying glaciology in the polar regions, geology students can gain insights into the processes of ice formation, movement, and melting. This knowledge is critical for understanding rise in sea level and its impact on global coastlines.

Mineral Resources: The Arctic is rich in mineral resources, including precious metals and rare earth elements. Understanding the geology of these regions can aid in the responsible extraction and management of these resources. This is particularly relevant as climate change makes these resources more accessible.

Interdisciplinary Insights

Environmental Science: Polar studies are inherently interdisciplinary, often requiring knowledge of both chemistry and geology. Environmental science students can benefit from this intersection, gaining a holistic understanding of how chemical and geological processes interact to shape our planet.

Technological Advancements: Studying the Arctic often involves advanced technology, from ice-breaking ships to remote sensing equipment. Students gain hands-on experience with cutting-edge tools and methodologies, preparing them for future careers in scientific research and environmental monitoring.

Policy and Conservation: Understanding the science behind polar regions is crucial for informing policy decisions and conservation efforts. Students equipped with knowledge in Arctic studies can contribute to global discussions on climate change, environmental protection, and sustainable resource management.

India's Strategic National Interests

Encouraging Arctic and polar studies has significant benefits for the Indian government, aligning with the nation's strategic, scientific, and environmental goals.

- The Arctic region plays a crucial role in global climate regulation. By studying Arctic weather patterns and their impacts, Indian researchers can develop better predictive models for climate phenomena, such as the monsoon cycles that are vital for India's agriculture.
- Knowledge gained from these studies helps in formulating robust climate policies and adaptation strategies to mitigate the effects of climate change, thereby enhancing India's resilience against climate-related disasters.
- Arctic studies promotes international scientific collaboration. This aligns with India's Arctic policy pillars of governance and international cooperation, fostering stronger ties with Arctic nations and contributing to global scientific discourse.
- Trained experts in Arctic governance and policy enable India to participate more effectively in international bodies such as the Arctic Council, enhancing India's influence in global environmental governance.
- By encouraging Arctic studies, India boosts its scientific research capabilities. This includes contributions to understanding the effects of climate change on polar regions, biodiversity, and ecosystems, which are crucial for global environmental health.
- Exposure to cutting-edge technologies used in Arctic research, such as remote sensing and climate modelling, can spur innovation and technological advancements within India.
- Studies focussed on Arctic biodiversity and conservation strategies provide insights into protecting endemic species and fragile ecosystems, which can be applied to conservation efforts within India.
- Learning about sustainable resource management and environmental protection in the Arctic can inform better practices and policies for India's environmental conservation efforts.
- The integration of Arctic and polar studies into university curricula across various disciplines such as biology, environmental science, international relations, law, and geography enriches academic programmes and broadens students' knowledge base.
- Students gain specialised skills in areas like geospatial analysis, climate

Reforms Driving Employment Growth in Cooperative Sector

Sagar Kisan Wadkar
Naveen Kumar Singh

As Indian cooperative fraternity celebrates the third anniversary of the Ministry of Cooperation on July 6, 2024, it also commemorates the 102nd International Day of Cooperatives. This year's theme, "Cooperatives Build a Better Future for All," aligns perfectly with the Ministry's mission over the past three years. Established in 2021, the Ministry of Cooperation was envisioned to breathe new life into the cooperative sector, which had experienced stagnation despite its long history dating back to 1904. The Ministry's establishment marked a significant turning point, introducing a series of transformative initiatives designed to rejuvenate and empower cooperatives across the nation. This article explores the extensive reforms undertaken by the Ministry and their impact on employment opportunities and economic growth in India.

Celebrating Three Years of Progress

The Ministry of Cooperation has been instrumental in revitalising the cooperative movement through a series of 54 initiatives. These initiatives were meticulously crafted after extensive consultations with state representatives and stakeholders, focussing on legislative reforms and easing business operations for cooperatives. The Ministry's efforts over the past three years have not only strengthened the cooperative sector but also significantly contributed to the broader socio-economic development of the country.

The Ministry of Cooperation is dedicated to achieving nine specific tasks within a set timeframe. These tasks include, transforming the vision from cooperation to prosperity, strengthening the cooperative movement, extending its reach to the grassroots level, and promoting a cooperative-based economic development model. This model instills a sense of responsibility among its members for national development and is designed to help cooperatives realise their potential. Additionally, the ministry aims to create a supportive policy, legal, and institutional framework.

A Continuity in Cooperative Reforms

The stable political environment and the union-level support in the country have provided a platform for the continuous growth of Cooperative Movement 2.0. This consistency has allowed the Ministry to pursue long-term strategies, ensuring that the cooperative sector continues to thrive and expand. The government's unwavering support has been crucial in implementing reforms that are vital for the sector's rejuvenation and the vision of "from cooperation to prosperity".

International Recognition and Milestones

The United Nations has declared 2025 as the International Year of Cooperatives, highlighting the global importance of cooperatives in promoting socio-economic development and sustainability. This declaration underscores the significant role that cooperatives can play in building inclusive economies and improving livelihoods worldwide.

India's commitment to the cooperative movement will be further recognised when the International Cooperative Alliance (ICA) hosts its Global Conference in New Delhi in November 2024. This event will serve as a launchpad for the celebrations of the International Year of Cooperatives in 2025, showcasing the importance of the Indian cooperative sector and the establishment of the new Ministry, which has provided a separate identity to the Indian cooperative movement.

As reported by the World Cooperative Monitor (WCM) 2023, Indian cooperative organisations like Indian Farmers Fertiliser Cooperative Limited (IFFCO), Gujarat Cooperative Milk Marketing Federation (GCMMF), and Krishak Bharati Cooperative Limited (KRIBHCO) are leading performers in the agriculture sector. Moreover, Uralungal Labour Contract Cooperative Society (ULCCS) holds the second position in the industry and utility sector, while twelve cooperative banks, including six State Cooperative Banks (SCBs), four Urban Cooperative Banks (UCBs), and one credit society, are ranked among the top 300 cooperatives worldwide. These cooperatives not only excel in their respective fields but also significantly contribute to employment and entrepreneurship opportunities in the country.

Key Operational Reforms and their Impact

One of the pivotal reforms introduced by the Ministry is the transformation of Primary Agricultural Credit Societies (PACS) into core business entities within the cooperative structure. The introduction of Model Byelaws has enabled PACS to diversify their activities, allowing them to engage in over 30 different sectors. This expansion has significantly benefited the rural economy by improving agricultural linkages, providing customised credit access, and promoting renewable energy solutions and safe drinking water.

The ability of PACS to diversify has created new business opportunities, leading to increased demand for skilled labour. For instance, PACS involved in renewable energy projects require engineers, technicians, and project managers, thus generating new employment opportunities. Similarly, PACS that expand into sectors like food processing, warehousing, and agro-tourism create jobs for various professionals, from agronomists to hospitality managers.

Additionally, the establishment of new national cooperatives such as Bhartiya Beej Sahakari Samiti Limited, National Cooperative Organic Limited, and National Cooperative Exports Limited has created numerous employment opportunities. These cooperatives require technical professionals from various fields, thereby offering new job prospects for the youth.

Financial and Administrative Reforms

The Ministry's tax reforms, offering deductions and exemptions, have alleviated the financial burden on cooperatives, enabling them to reinvest in growth and development. The digitalisation of Registrar of Cooperatives offices has streamlined the registration process, enhancing regulatory support and improving governance.

DID YOU KNOW ABOUT Sahakar Mitra?

It's a **4-month internship** program conducted by **NCDC**. It provides professional graduates with the **opportunity to gain experience** in the functioning of **NCDC** and related aspects of the **Cooperative Sector**.

SCAN QR CODE to know more about it.

@minofcooperatn Ministry of Cooperation

Moreover, the creation of a National Cooperative Database has facilitated better planning and implementation of more impactful initiatives.

These financial reforms have provided cooperatives with the capital needed to expand their operations and hire more staff. By reducing tax liabilities, cooperatives can allocate more resources towards hiring skilled professionals and investing in training programmes. This approach not only boosts employment but also enhances the overall efficiency and productivity of cooperatives.

The amendment of the Multi-State Cooperative Societies Act 2002 aims to enhance transparency and governance within multi-state cooperatives, ensuring more efficient and accountable operations. This legal reform has instilled greater confidence among members and stakeholders, encouraging more active participation and investment in cooperatives.

Employment Opportunities and Support

Cooperatives have emerged as pivotal agents in fostering employment across various sectors, exemplifying their role in economic empowerment and community development. For instance, Amul not only sustains livelihoods through milk collection, processing, and marketing but also serves as a model for job creation within the dairy industry. Similarly, fertilizer cooperatives like IFFCO and KRIBHCO bolster manufacturing, logistics, and distribution sectors, providing substantial employment opportunities. Credit cooperatives contribute by expanding financial services, thereby generating jobs in banking, while sugar cooperatives stimulate employment in sugarcane cultivation, milling, processing, and allied industries.

Beyond traditional sectors, cooperatives are diversifying into new domains under progressive policy frameworks, aiming to harness untapped potential and create employment avenues, particularly for the youth. The expansion into sectors like multi-state cooperatives such as Bhartiya Beej Sahakari Samiti Limited, National Cooperative Organic Limited, and National Cooperative Exports Limited, demands specialised skills in agronomy, organic farming, export management, and other technical domains. These developments present lucrative career paths, contributing significantly to reducing unemployment rates.

Moreover, the Ministry's initiatives facilitate the scaling up of cooperative operations, necessitating technical expertise in emerging fields such as renewable energy. For instance, Primary Agricultural Credit Societies (PACS) venturing into solar and biogas projects require engineers and technicians proficient in sustainable energy systems. Additionally, the digital transformation of cooperative operations and the establishment of a National Cooperative Database have spurred demand for IT professionals adept in data analysis, software development, and cybersecurity.

As cooperatives diversify their activities, there is a growing need for administrative and technical personnel to manage expanded operations and ensure compliance with regulatory frameworks. This expansion not only creates jobs within cooperative departments at state and union levels but also enhances administrative efficiency and governance standards.

Furthermore, mentorship programmes offered by established cooperatives to newer entities, akin to the support models used by Self-Help Group (SHG) federations, play a crucial role in expanding business horizons. These programmes not only foster business growth but also create employment opportunities for mentors and trainers, enriching the cooperative ecosystem with skilled professionals.

In addressing rising unemployment, cooperatives embody a sustainable solution by promoting community-driven development and collective ownership. By nurturing local economies and providing stable employment, cooperatives contribute significantly to socio-economic progress. They stimulate secondary job creation through extended value chains, demonstrating their role in fostering social entrepreneurship and self-employment opportunities.

Through collaborative efforts with educational institutions and professional organisations, the Ministry of Cooperation ensures continuous skill development among cooperative members. This proactive approach cultivates a skilled workforce capable of driving innovation and sustainable growth across diverse cooperative sectors.

SOLAR ENERGY CORPORATION OF INDIA LIMITED
 (A Government of India Enterprise, Miniratna Category-I
 Schedule 'A' CPSE)

 6th Floor, Plate - B, NBCC Office, Block Tower - 2, East Kidwai Nagar,
 New Delhi - 110023 | CIN No. U40106DL2011GOI225263

Solar Energy Corporation of India Ltd. (SECI) is a CPSE under the administrative control of the Ministry of New and Renewable Energy invites applications for the positions of Consultants in various disciplines as below:

- SR. CONSULTANT (Contracts & Procurement)**
- SR. CONSULTANT (Personnel & Administration)**
- SR. CONSULTANT (Merchant Power)**

BENEFITS OFFERED:

- The monthly consolidated fee for all the above posts is ₹ 1,30,000/- (Indian Rupees one lakh thirty thousand only).
- Reimbursement towards mobile and internet facility upto monthly ceiling of ₹2000/-
- In case of posting in Site Office of SECI, SECI will provide suitable Bachelor Accommodation.
- Reimbursement towards Conveyance upto monthly ceiling of ₹12000/-.
- In case of outstation official tour, SECI will pay TA/DA equivalent to E-6 Grade Officer.
- The Consultant shall be eligible for 1 day leave for each completed month of service.

For further detailed Notification please visit our website www.seci.co.in 'Career' section. Last date of receipt of application is **24.07.2024**.

2. Eligibility Conditions: -**(I) Deputation or absorption:**

From amongst the regular Group 'C' employees in Pay Band-1, Rs. 5200-20200/- plus Grade Pay of Rs.1800/- (pre-revised as per 6th CPC) in the National Centre for Organic & Natural Farming, Ghaziabad including its Regional Centres and Central Fertiliser Quality Control & Training Institute, Faridabad including its Regional Laboratories, who possess valid driving license for motor cars on the basis of a driving test to assess the competence to drive motor cars, failing which from officials holding the post of Dispatch Rider on regular basis or regular Group 'C' employees in Pay Band-1, Rs. 5200-20200/- plus Grade Pay of Rs. 1800/- (pre-revised as per 6th CPC) in other Ministries of the Central Government, who fulfill the necessary qualifications as mentioned below:-

Essential

- (i) Possession of a valid driving license for motor cars;
(ii) Knowledge of motor mechanism (the candidate should be able to remove minor defects in vehicle);
(iii) Experience of driving a motor car for at least 03 years; and
(iv) Pass in 10th Standard from a recognized Board.

Desirable: Three years' service as Home Guard or Civil Volunteers.

(II) Deputation or Re-employment for Armed Forces Personnel:

The Armed Forces Personnel due to retire or who are to be transferred to reserve within a period of one year and having the requisite experience and qualifications prescribed shall also be considered. Such persons would be given deputation terms up to the date on which they are due for release from the Armed Forces; thereafter they may be continued on re-employment.

Note: The period of deputation including the period of deputation in another ex-cadre post held immediately preceding this appointment in the same or some other organization or Department of the Central Government shall ordinarily not exceed three years. The maximum age limit for appointment by deputation or absorption shall be "not exceeding fifty-six years" as on the closing date of receipt of applications.

3. Duties and Responsibilities attached to the posts: -

To drive the office vehicle and rectify/repairing small faults if there during driving the vehicle.

4. Regulation of pay and other terms of deputation: -

The pay of the candidate selected for appointment on deputation basis will be regulated in terms of DoPT's O.M. No. 6/8/2009-Estt. (Pay II) dated 17.06.2010, as amended from time to time.

5. Age Limit: -

The maximum age limit for appointment by deputation or absorption shall be "not exceeding fifty-six years" as on closing date of receipt of application.

6. Period of deputation: -

Period of deputation including the period of deputation in another ex-cadre post held immediately preceding this appointment in the same or some other organization or department of the Central Government shall ordinarily not exceed three years.

7. Place of Posting: -

Regional Centre for Organic & Natural Farming, Nagpur and Ghaziabad.

8. Applications of only such candidates will be considered as are routed through proper channel and are accompanied by (i) Bio-data (in duplicate) as per proforma Annexure-I, (ii) Photocopies of APARs for last 5 years attested (signed & stamped) on each page by an officer not below the rank of Under Secretary to the Government of India level and (iii) Certificate from the employer that particulars furnished by the candidate are correct and he/she possesses educational qualifications and experience mentioned in vacancy circular/advertisement and certificates regarding Vigilance Clearance, Integrity and Major/Minor penalty at the end of the Bio-data.

9. Complete advertisement, Bio-data format (Annexure-I) and certificate format for VC, IC etc. can be downloaded from the National Centre for Organic & Natural Farming's website: <http://ncof.dacnet.nic.in> or Department of Agriculture & Farmers Welfare's website: www.agriwelfare.gov.in (link-recruitment).

10. Applications of willing, suitable and eligible candidates and who can be spared immediately in the event of their selection may be sent to the Director, National Centre for Organic & Natural Farming, Hapur Road, Kamla Nehru Nagar, Ghaziabad (U.P.) - 201002 within a period of 60 days from the date of publication of the advertisement in the Employment News/Rozgar Samachar. Applications not forwarded through proper channel or those received without requisite certificates and necessary documents will not be entertained.

The candidates from the Central Government shall only be considered for absorption. The crucial date of determining eligibility will be the last date for receipt of applications.

11. Advance copies of applications or those received after the prescribed closing date or not accompanied by supporting certificates/documents in support of qualifications and experience claimed by the candidates would not be processed for determining the eligibility of the candidates for the selection and shall be liable to be rejected.

12. The candidates who apply for the post will not be allowed to withdraw their candidature subsequently.

Cultural Splendour: India's Tribal Festivals

EN EXPLAINS

India's vibrant tribal festivals are a testament to the nation's rich cultural heritage, encapsulating the essence of its diverse traditions through dance, music, and customs. Held annually, these festivals serve as a conduit for cultural exchange and the preservation of ancestral practices. Attendees are invited to immerse themselves in a kaleidoscope of programmes, adorned with traditional costumes, intricate handicrafts, and the mesmerising rhythms of folk songs and dances. The culinary offerings, featuring unique tribal cuisine, provide a deeper insight into the gastronomic traditions of these communities. By celebrating these festivals, the continuity of tribal heritage is ensured, offering all Indians a profound cultural experience. These celebrations honour the legacy of tribal communities and reinforce the unity in diversity that is the cornerstone of India's identity.

Let's dive into the radiant mosaic of some of India's most cherished tribal festivals!

Dree Festival of Arunachal Pradesh: A Bountiful Celebration

Nestled amidst the lush valleys of Arunachal Pradesh, a vibrant melody of tradition and thanksgiving fills the air every July. This is the Dree Festival, a three-day extravaganza celebrated by the Apatani tribe, a community renowned for its sustainable agricultural practices. More than just a merrymaking occasion, Dree is a deeply rooted ritual steeped in history, reflecting the tribe's deep connection with the land and their reverence for a bountiful harvest.

The Dree festival's origins lie in the Apatani belief system. The Apatanis, who inhabit a tranquil pine-clad valley called Ziro at the core of Lower Subansiri District of Arunachal Pradesh, are famous for their unique practice of wet rice cultivation. They are also known for their sustainable agricultural practices and the agricultural cycles that govern their everyday lives. Traditionally, a period of rituals known as Dree Pwlo precede the celebratory aspects of the festival aimed to appease deities to ensure prosperous harvest.

The festival pulses with vitality. Drumbeats reverberate, women in vivid attire gracefully perform the 'Pri' dance, and the air is filled with the enticing aroma of local brews. A kaleidoscope of colours unfolds as locals don their finest attire, facial tattoos, and distinctive headgear. Dree fortifies cultural identity, fostering a sense of community and togetherness as families come together to celebrate their harvest.

Visitors from across India and the globe flock to Ziro, the heart of the Apatani valley, to witness this unique cultural spectacle. This influx of tourism has provided a significant economic boost to the region. Local artisans showcase their exquisite handwoven textiles and handcrafted souvenirs, generating additional income.

This cultural extravaganza serves as a bridge between the Apatani's rich past and their evolving future. By showcasing their cultural heritage to the world, the festival fosters a deeper appreciation for their sustainable agricultural practices and unique way of life.

Njangattiri Aanayoottu of Kerala: A Feast for Giants

In the lush, monsoon-kissed heart of Kerala, where the rains herald a time of renewal, a spectacular festival graces the Njangattiri Bhagavathi Temple in Palakkad. This is the Njangattiri Aanayoottu, a mesmerising ceremony that translates to "feeding of the elephants."

This festival centers around nourishing elephants with a specially prepared diet aimed at enhancing their health and well-being. This ritual, steeped in centuries of tradition, underscores the cultural and religious significance of elephants in Kerala.

On the first Friday of Karkidakam (last month of the Malayalam calendar from mid July to August), the temple grounds are transformed into a spectacular banquet hall where devotees gather as priests meticulously prepare an Ayurvedic feast for the elephants, believed to fortify their health during the monsoon season. The climax of the event unfolds as the beautifully caparisoned elephants are offered the food, creating a poignant tableau of human-animal connection. Beyond its visual splendour, the festival epitomises Kerala's profound reverence for temple elephants.

The Njangattiri Aanayoottu has blossomed into a significant tourist attraction, drawing visitors from across India and the globe. Witnessing this unique cultural spectacle provides a window into Kerala's rich heritage and its deep-rooted connection with nature. This influx of tourism translates into a significant economic boost for the region. Local businesses, from hotels and restaurants to souvenir shops, experience a surge in activity during the festival. Additionally, the demand for the special Ayurvedic food preparations creates opportunities for local artisans and traditional healers.

The festival is more than just a feeding ceremony; it's a captivating display of cultural heritage, spiritual reverence, and a deep respect for nature. It offers a glimpse into the soul of Kerala, where tradition thrives and the bond between humans and animals is celebrated in a truly unique way.

The Phyang Tsedup: A Celebration of Faith and Heritage in Ladakh

High in the Himalayas, nestled amidst the breathtaking landscapes of Ladakh, lies the ancient Phyang Monastery. Each year, during the vibrant months of July and August, this sacred site transforms into a stage for a captivating spectacle - the Phyang Tsedup Festival. More than just a celebration, it's a vibrant tapestry woven from faith, heritage, and the enduring spirit of the Ladakhi people.

The Phyang Tsedup Festival, established in the 16th century, pulsates with vibrant energy over two days. Monks in colourful costumes perform the sacred Cham dance, a captivating story through movement. A colossal

Thangka, a revered tapestry, is unveiled, marking a moment of deep reverence. Beyond the ceremony, the festival offers a glimpse into Ladakhi culture with local crafts, delicious cuisine, and a strong sense of community.

The carnival holds immense significance for the Ladakhi people. It serves as a potent symbol of their Buddhist faith, strengthening their connection to

Continued from page 20

Cultural Splendour: India's Tribal Festivals

their spiritual roots. The festival also plays a crucial role in preserving the rich tradition of Cham dance, ensuring its continuation for generations to come. Additionally, it fosters a sense of cultural identity within the Ladakhi community, reaffirming their unique customs and traditions.

The Phyang Tsedup Festival draws a huge number of visitors every season, providing a major thrust to tourism, which translates in a significant economic boost for the region. Local businesses, from hotels and restaurants to souvenir shops, experience a surge in activity during the festival. Additionally, the demand for festival offerings like costumes, masks, and Thangka paintings creates opportunities for local artisans and craftspeople.

The Electrifying Minjar Festival of Himachal Pradesh: Where Faith Meets Fury

The Minjar Fair is a prominent and historic festival celebrated in Chamba district of Himachal Pradesh. This week-long event begins on the first Sunday of August each year. Symbolising Chamba's cultural heritage and traditions, the fair attracts not only locals but also tourists from across the country and abroad.

The history of Minjar Fair dates back several centuries, believed to have originated during the reign of Raja Sahil Varman. According to legend, the fair was initially organised by the people of Chamba to pray for the king's long life and prosperity. It is also linked to agriculture, particularly the sowing of maize and rice crops, where 'Minjar' (maize flowers) are symbolically worshipped.

The fair commences in the historic Chamba Chaugan ground. It begins with prayers at the Laxminarayan Temple and Champavati Temple on the banks of the Ravi River. Participants tie Minjar threads to their attire, symbolising good fortune and prosperity. The Minjar Fair not only preserves Chamba's culture and traditions but also plays a vital role in the social and economic life of the region. It is a major tourist attraction, boosting the local economy.

During the fair, various cultural and traditional programmes are held, including local folk dances, songs, dramas, and tableaux. Local artists, along with performers from across the country, participate in these events. Additionally, there are sports competitions, craft exhibitions, and commercial fairs held at the fairground.

The highlight of the Minjar Fair is the 'Shahi Julus' (royal procession), where the king of Chamba and other dignitaries participate in traditional attire. The procession winds through the main streets of Chamba, culminating at the banks of the Ravi River, where the 'Minjar' is immersed in the river, symbolising prayers for prosperity and well-being. The fair concludes with special prayers and the immersion ceremony.

Goncha Festival of Bastar: A Chariot Procession of Colours

Chhattisgarh is home to a significant tribal population, each tribe possessing a unique cultural identity. Their distinct culture is best expressed in their festivals, celebrated with great fervour and grandeur. Every year, during the Dussehra festivities, a unique spectacle unfolds, transforming the landscape into a kaleidoscope of colours. This is the Goncha Festival, a mesmerising blend of tradition, mythology, and artistic expression.

The Goncha Festival, also known as the Chariot Festival, coincides with the Jagannath Rath Yatra. Several traditions are associated with this festival. 'Goncha' is a type of fruit, and during the festival, tribal people create toy pistols using *tukki* (a kind of bamboo). These mock weapons, which shoot fruit pellets, are crafted as part of the tribe's traditions.

Participants use these toy pistols in mock battles, aiming not to harm but to engage in a thrilling and joyful encounter. The enthusiasm and spirit of the tribal communities participating in the Goncha Festival are incredible. Such celebrations highlight the ethnic diversity of the region.

Meghalaya's Behdienkhlam Festival: Chasing Away Evil Spirits with Joy

The Behdienkhlam Festival is a significant and traditional festival celebrated by the Jaintia community in Meghalaya. The term "Behdienkhlam" translates to "driving away the plague." This festival is primarily held to pray for a good harvest and protection from diseases. Celebrated in July, the festival lasts for four days.

The festival is celebrated by the Khasi and Jaintia tribes, focussing on agriculture and seeking blessings for a bountiful harvest. It showcases the rich culture and traditions of the Jaintia community. Several rituals and religious activities are performed during the festival:

- **Log Carrying (known as "Rot" in Khasi):** Villagers carry large wooden logs through the streets, symbolising the expulsion of diseases and evil spirits.
- **Kherchi Ritual:** On the second day, rituals are conducted at various sacred sites, where people pray to the deities for blessings and good health.
- **Symbolic Battle:** On the third day, young men participate in a symbolic battle using bamboo sticks. This ritual represents the expulsion of evil spirits and the protection of the village.
- **Khalam Dance:** The festival concludes with this traditional dance, where people dress in colourful attire and perform to pray for a good harvest.

Today, the Behdienkhlam Festival is not just a religious ceremony but a representation of the Jaintia community's identity and cultural heritage. It helps preserve and pass down traditions to future generations, reflecting gratitude towards nature and a positive outlook on life. The vibrant Behdienkhlam Festival attracts tourists, offering a glimpse into Pnar heritage. This influx boosts the local economy. Hotels, homestays, shops, and restaurants see a surge in activity. Additionally, the demand for festival attire, instruments, and food creates opportunities for local artisans and entrepreneurs.

India's tribal festivals are a testament to the nation's rich cultural mosaic, showcasing the unique heritage and traditions of various tribal communities. From the agricultural rituals of the Dree Festival in Arunachal Pradesh to the symbolic battles of Meghalaya's Behdienkhlam, these celebrations highlight the deep connections between tribes, their land, and their traditions. The

tourists, these festivals attract, also support local economies and fosters cultural exchange. By preserving and celebrating these vibrant traditions, India honours its diverse heritage, reinforcing the unity and strength found in its cultural diversity.

Director (WZ)

No. I-12014/06/2023-NCB-II
Government of India/ Bharat Sarkar
Ministry of Home Affairs/ Grih Mantralaya

IS-II Division

Room No-10, 2nd Floor, Major Dhyan Chand National Stadium, New Delhi-110002

Subject : Filling up of the post of Additional Director General (ADG) in Narcotics Control Bureau (NCB) under the Ministry of Home Affairs on deputation basis-Regarding.

It is proposed to fill up 01 (one) newly created post of **Additional Director General (ADG)** in Narcotics Control Bureau (NCB) under the Ministry of Home Affairs on deputation basis. The post is in the revised pay matrix level-15 of the CCS (RP) Rules, 2016. The terms and conditions of deputation will be governed by the guidelines issued by Department of personnel & Training's vide OM. No. 6/8/2009-Estt. (Pay II) dated 17.06.2010 & OM No. 2/6/2016-Estt.(Pay-II) dated 17.02.2016 as amended from time to time. The period of deputation, including deputation in another ex-cadre post held immediately preceding this appointment in the same or some other Organization or Department of the Central Government, shall ordinarily not exceed 5 (five) years.

2. As per one time permission granted by UPSC to fill up the vacancy of newly created post of ADG in NCB, the post is to be filled on deputation basis from the Officers of All India Services and Officers of other Group 'A' Central Services:-

(a) (i) holding analogous post on regular basis in the parent cadre or department; or (ii) approved for appointment in Level-15 of pay matrix or equivalent in Government of India.

(b) **possessing the following experience:-**

(i) 12 years' experience in enforcement of regulatory laws, investigation of economic and criminal offences and collection of intelligence relating thereto.

3. Applications of willing and eligible officers, whose services can be spared without delay in the event of their selection, may be forwarded in the prescribed proforma alongwith the following documents so as to reach this Ministry **within 06 (Six) weeks from the date of issue of this circular or publication of advertisement in Employment News, whichever is later:**

(i) Attested copies of APARs for the last 5 (five) years and preferably up to 2022-2023 duly attested by an officer not below the rank of Under Secretary to the Government of India or equivalent.

(ii) Cadre Clearance from the State Government as well as from Cadre Controlling Authority incorporating that in the event of his/her selection, he/she will be relieved to join the post of Additional Director General in NCB on deputation basis.

(iii) Vigilance Clearance Certificate as per proforma.

(iv) Integrity Certificate.

(v) A certificate to the effect that no Major/Minor Penalty has been imposed upon the candidate during the last 10 (ten) years.

4. The maximum age limit for appointment on deputation shall not exceed 58 years as on the closing date of receipt of application. Officers on the verge of promotion/ superannuation need not apply. The incomplete application or those received after the last date shall not be entertained. The officer, who is selected for the said post, shall not be allowed to withdraw his/her candidature.

UGC's Biannual Admission System ...

The Gross Enrolment Ratio (GER) is a crucial metric that gauges the proportion of students enrolled in university programmes relative to the eligible age group (18-23) for higher education. It serves as a vital indicator of both educational accessibility and inclusivity. The adoption of biannual admissions represents a strategic initiative aimed at fostering educational equity and bolstering India's competitive standing in the global arena. This proactive approach not only aims to increase enrolment rates but also endeavours to create a more dynamic and responsive higher education landscape that can better meet the diverse needs of students and the evolving demands of the global economy.

Academia-Industry Synergy for Teaching, Training, Research, and Job Opportunities

A systematic collaboration between the academia and the industry is highly required for the purpose of teaching, training, research, and job opportunities. Biannual admission process will keep academia and industry in active mode to fulfill each other's requirements throughout the year. A systematic interface through Memorandum of Understanding (MoU) and tie-ups will help both the stakeholders in many ways, such as planning and development of course curriculum, providing teaching, training and research inputs/platforms, preparing graduates for the industry during their academic programmes and providing them internships and job opportunities accordingly.

The biannual admission process will provide campus recruitment opportunities for the students twice a year. It means the industry may conduct campus recruitment twice a year in universities/institutions thereby leading to more employment opportunities for the graduates. This practice will strengthen the association between the academia and the industry, which has utmost importance in today's scenario.

International Collaboration & Student Exchange Programmes

UGC Chairman Prof. M Jagadeesh Kumar highlighted that the biannual

admission system, long practiced in higher education globally, has significantly enriched millions of graduates abroad by offering ample opportunities. Implementing this system in Indian universities is poised not only to fulfill national educational requirements but also holds the promise for fostering international collaborations and expanding student exchange programmes, thereby enhancing India's global competitiveness and aligning with international educational benchmarks. This strategic move is expected to position India as a premier 'Global Study Destination' in the foreseeable future.

Implementation Strategy and Challenges

UGC's decision to implement biannual admissions holds significant promise for enhancing Indian higher education. However, the success of this initiative hinges on the strategies adopted by universities and the challenges they may encounter during implementation. UGC Chairman Prof. M Jagadeesh Kumar views the biannual admission system as an opportunity for universities to leverage their potential and enhance competitiveness, both nationally and internationally. Notably, while the adoption of biannual admissions is encouraged, it will not be mandatory for universities to implement the system immediately. Universities retain autonomy to assess their readiness

and can phase in the system gradually. Prof. Kumar suggests starting with select programmes and expanding gradually after securing necessary approvals from statutory bodies like academic and executive councils. This phased approach aims to ensure effective implementation and smooth integration of biannual admissions into the higher education landscape.

Here, it is important to note that the Indian higher education system is witnessing a number of reform measures after implementation of the National Education Policy (NEP) 2020, which aims to transform the entire education scenario in the coming decades. The biannual admission system is one of the visionary initiatives in this regard. However, there are various challenges which need to be addressed on priority basis for smooth implementation of this system.

Mapping and Mobilisation of Infrastructural Resources

Indian universities/institutions are in the process of adopting various provisions, particularly new academic programmes, as per the mandate of National Education Policy (NEP) 2020 in a phased manner, which essentially requires adequate infrastructural resources and sufficient number of faculties and staff in most of the universities. Implementation of the biannual admission will further create additional pressure in the university system in case of inadequate infrastructure, insufficient faculty and staff and student support services, which will have

adverse effect on teaching-learning, research and other activities. However, UGC Chairman Prof. M Jagadeesh Kumar has already clarified that the biannual admission process is not mandatory for universities. They may assess the situation by mapping their existing infrastructural resources and accordingly proceed for the implementation of biannual admission.

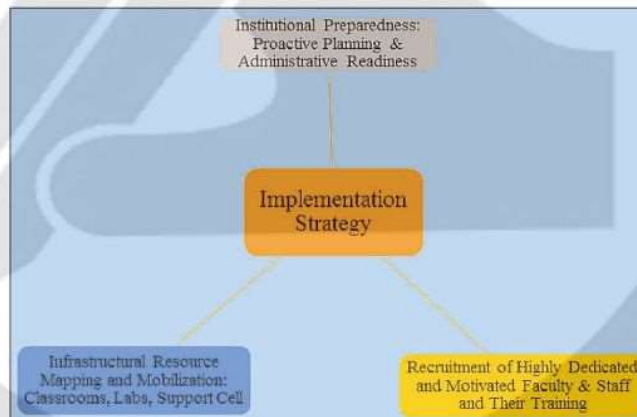

Recruitment of Dedicated and Motivated Faculty and Staff

Indian universities may optimise their infrastructural resources for the usefulness of biannual admissions only when they get sufficient number of faculty and staff and to prepare them for future implementation of various provisions envisioned under the NEP 2020. At present, most of the universities/institutions are going through a transition phase after implementation of NEP, thereby leading to excessive pressure on faculty and staff across the nation. Therefore, it is important to recruit adequate number of highly motivated and dedicated faculty and staff and prepare them for the implementation of various provisions of NEP 2020 such as biannual admission etc. through proper training. It will improve the functioning of universities and will help in the smooth conduct of admissions twice a year.

The initiative of biannual admission in Indian universities/institutions is a welcome step which will transform the Indian higher education landscape through its flexibility and accessibility. It will help in achieving a GER of 50% by 2035 as envisioned in NEP 2020.

However, the most important aspect is its implementation at the ground level. Though it is not mandatory for the universities to implement, it is an opportunity for them. It will depend on the preparedness of Indian universities/institutions such as their proactive planning, infrastructural resource mapping and mobilisation, recruitment of adequate number of motivated and dedicated faculty and staff, administrative readiness and development of student support mechanisms.

Reforms Driving Employment ...

Government Support and Future Prospects

The government's commitment to revitalising the cooperative sector is evident through various supportive interventions. These include reviving sugar mills, expanding the National Cooperative Development Corporation (NCDC) to offer comprehensive support, and integrating cooperatives into the Government e-Marketplace (GeM) portal as buyers. Collaborations with institutions like the National Cooperative Union of India (NCUI) and the National Council for Cooperative Training (NCCT) have led to numerous education and training programmes aimed at enhancing technical skills and professionalism within cooperatives.

Reforms in cooperative banking seek to improve efficiency and financial stability, while a new National Cooperation Policy under development aims to harmonise cooperative legislation across states, strengthen cooperative education, and extend the movement's reach.

The government's proactive approach was highlighted in the recent national workshop, "Chintan Shivir," part of the "Viksit Bharat: Vision 2047" series during the month of March 2024, underscoring the commitment to using cooperatives as a vehicle for national development.

The Ministry of Cooperation's forward-looking policies and initiatives are setting the stage for a resilient and dynamic cooperative sector. By fostering innovation, promoting sustainability, and

enhancing economic inclusivity, these reforms are positioning cooperatives as key drivers of national development.

Conclusion

The Ministry of Cooperation's transformative initiatives over the past three years have revitalised the cooperative movement in India, creating a robust framework for sustainable economic growth and development. These reforms have not only strengthened cooperatives but also significantly increased employment opportunities, directly addressing the pressing issue of unemployment in the country. The government's unwavering support and the international recognition of cooperatives underscore the importance of this sector in building a resilient and inclusive economy.

As the Ministry continues to implement forward-looking policies and initiatives, the cooperative sector is poised to play a crucial role in driving India's economic progress. The celebration of the International Year of Cooperatives in 2025, alongside the ICA Global Conference in New Delhi, will further highlight the achievements and future potential of the Indian cooperative movement. The cooperative model, with its emphasis on community-driven development and shared ownership, offers a sustainable solution to unemployment and economic disparities, paving the way for a prosperous and equitable future for all.

Advancing Knowledge, Shaping Policy ...

modelling, and international law, making them well-equipped for careers in research, policy-making, and environmental management.

- Understanding the economic potential and sustainable exploitation of Arctic resources (e.g., oil, gas, minerals) can guide India in managing its own natural resources more effectively.
- Knowledge of innovative technologies and sustainable practices in the Arctic can stimulate the development of green technologies in India, promoting economic growth and environmental sustainability.
- Educating youth in Arctic studies helps build a cadre of experts who can lead India's efforts in climate science, environmental protection, and international diplomacy.
- This initiative aligns with the national capacity building pillar of India's Arctic policy,

ensuring that India is well-prepared to address both domestic and global environmental challenges.

The UGC's launch of MOOCs on Arctic and polar studies is a forward-thinking initiative that aligns with India's strategic interests and Arctic policy. By encouraging youth to pursue these studies, India not only enhances its scientific and environmental knowledge but also strengthens its position in global governance, fosters international cooperation, and builds national capacity. This comprehensive approach ensures that India remains an active and informed participant in addressing the critical issues of climate change and environmental sustainability.

BEST ENTRY FOR

ISSUE DATED 15-21 June 2024

Question: With the country experiencing soaring summer temperatures, energy usage has reached unprecedented levels. We welcome your insights on how to reduce the environmental impact and lower energy bills during these hotter months?

Shruti Sharma

Madhya Pradesh

India experienced exceptionally warm summers this year. This surpassed the previous record for high temperatures. A significant issue accompanying these soaring temperatures is the increased use of electricity as people maximise their usage of electrical appliances to combat the heat.

To mitigate excessive electricity consumption, simple measures can be adopted. Applying light-colored paint to external surfaces, particularly roofs and walls, can reduce heat absorption and increase sunlight reflection. Installing UV-blocking coatings on windows can shield

interiors from intense sunlight. Adequate ventilation plays a crucial role in lowering indoor temperatures. Planting trees strategically for natural shade and implementing green roofs can act as effective insulation in hot areas. Dehumidifiers can also help cool indoor air by reducing humidity levels, which contribute to perceived heat.

Conserving electricity can be further supported by basic practices such as turning off appliances during cooler hours like early morning or evening, and using clay pots for storing cold water. Bathing with cold water helps regulate body temperature. Additionally, sprinkling recycled water to cool your surroundings can aid in reducing heat. These simple habits not only save electricity but also mitigate heat impact effectively.

President's Parliament Address Sets Stage for Transformational Socio-Economic Reforms

President Smt. Droupadi Murmu addressed the joint session of Parliament on June 27, promising significant socio-economic reforms in the upcoming budget session under the National Democratic Alliance (NDA) government. This marked her first Presidential Address since the government's formation. Stressing the government's commitment to comprehensive development, the President highlighted the government's efforts towards enhancing connectivity and development in the North East, including the establishment of a Rs 27,000 crore semiconductor plant in Assam aimed at bolstering India's semiconductor production. She also addressed the recent NEET-UG examination irregularities, assuring the nation of a thorough investigation and stringent penalties for those involved in the leaks. President Smt. Droupadi Murmu's address outlined a broad agenda focussing on economic growth, social justice, and governance reforms, setting the stage for what is anticipated to be a transformative budget session.

Anti-Paper Leak Law for Exams Comes Into Effect

The Public Examinations (Prevention of Unfair Means) Act, 2024, which aims to prevent unfair means in public examinations and common entrance tests held across the country, came into effect on June 21, 2024. The Bill was passed by both Houses of Parliament in February this year. It seeks to prevent the use of "unfair means" in public examinations and bring "greater transparency, fairness, and credibility." The public examinations referred to in the Act include those conducted by authorities notified by the central government. These include the Union Public Service Commission, Staff Selection Commission, Railway Recruitment Board, National Testing Agency, Institute of Banking Personnel Selection, and Departments of the Central Government and their attached offices for recruitment. The Act also prohibits the disclosure of exam-related confidential information before time and unauthorised people from entering exam centers to create disruptions. Offenses will be punishable with imprisonment between three and five years and a fine of up to Rs 10 lakh. All offenses under the Bill will be cognizable, non-bailable, and non-compoundable.

Ladakh Becomes First in the Country to Achieve Full Functional Literacy Milestone under ULLAS Scheme

Ladakh has become the first administrative unit to attain full functional literacy under the ULLAS-Nav Bharat Saaksharta Karyakram (New India Literacy Programme). Exceeding 97% literacy, this achievement highlights the success of the centrally sponsored initiative, which empowers adults aged 15 and above with essential literacy, numeracy, and life skills. The ULLAS Scheme, running from 2022 to 2027, aims to empower individuals from diverse backgrounds by enhancing foundational literacy, critical life skills, and vocational education opportunities.

Fast Track Immigration - Trusted Traveller Programme Launched to Simplify International Travel

Home Minister Shri Amit Shah inaugurated the 'Fast Track Immigration - Trusted Traveller Programme (FTI-TTP)' at Terminal 3 of Indira Gandhi International Airport on June 22. This pioneering initiative aims to simplify and expedite international travel for Indian nationals and OCI (Overseas Citizenship of India) cardholders through automated e-Gates, ensuring faster and secure immigration clearance free of charge. The FTI-TTP is part of the government's 'Viksit Bharat @2047' agenda, emphasising Prime Minister Shri Narendra Modi's vision to enhance travel efficiency and convenience. The programme will roll out in two phases: initially

covering Indian citizens and OCI cardholders, with plans to extend to foreign travellers in subsequent phases. It will be implemented at 21 major airports across India, including Mumbai, Chennai, Kolkata, Bengaluru, Hyderabad, Kochi, and Ahmedabad.

INTERNATIONAL

India and Bangladesh Forge New Partnerships with MoU Exchange

In a significant diplomatic engagement at Hyderabad House, New Delhi, Prime Minister Shri Narendra Modi and visiting Bangladesh Prime Minister Ms Sheikh Hasina oversaw the exchange of several Memoranda of Understanding (MoUs) aimed at bolstering cooperation across multiple sectors. The ceremony marked a pivotal moment in India-Bangladesh relations with key agreements focussing on digital partnership, green initiatives, maritime cooperation, healthcare, space technology, railways, oceanography, disaster management, fisheries, and defense education. The leaders emphasised their commitment to enhancing connectivity, commerce, and collaboration, underscoring a shared vision for regional and international cooperation, including in forums like BIMSTEC and the Indo-Pacific Oceans Initiative. Meanwhile, India has announced e-medical visa facility for Bangladeshi nationals seeking medical treatment in India and the establishment of a new Assistant High Commission in Rangpur, Bangladesh.

The Government of India has made a whopping contribution of almost USD 1.17 Million for 'Hindi @UN' project to expand the use of Hindi in the United Nations. This contribution is part of India's partnership with the UN Department of Global Communications (DGC) since 2018 to mainstream and consolidate news and multimedia content of DGC in Hindi language. Since 2018, the UN News in Hindi is disseminated through UN's website and social media handles - X, Instagram and a UN Facebook Hindi page. A UN News-Hindi audio bulletin (UN Radio) is released every week.

ECONOMY

Indian Passenger Vehicle Industry Expects 3-5% Growth in FY25

The Indian passenger vehicle (PV) industry is forecasted to grow by 3-5% in fiscal year 2025, following a 7.4% increase in FY24, according to CareEdge. Factors like stabilised post-COVID demand, higher vehicle prices, and persistent high interest rates contribute to this moderated growth. SUVs remain popular, with a 22.4% surge in FY24, while electric vehicles show promise with a 90% year-on-year growth. Challenges persist for entry-level vehicles amidst shifting consumer preferences towards SUVs and economic pressures in rural and urban markets.

SPORTS

Indian AFMS Officers Shine with 32 Medals at World Medical and Health Games

Four officers from the Armed Forces Medical Services (AFMS) of India have achieved outstanding success at the 43rd World Medical and Health Games in Saint-Tropez, France, held from June 16 to 23, 2024. Lt Col Sanjeev Malik, Maj Anish George, Capt Stephen Sebastian, and Capt Dania James collectively secured a record-breaking 32 medals, comprising 19 gold, 9 silver, and 4 bronze. Lt Col Sanjeev Malik led with five gold medals in the above 35 years male category, excelling in events such as the 800m, 1500m, 3000m, 5000m, cross country, and the 4x100m relay. Maj Anish George demonstrated versatility with four gold, six silver, and two bronze medals in the under 35 years male category, competing across a range

of disciplines including track events, throwing events, and powerlifting. Capt Stephen Sebastian claimed six gold medals in the under 35 years male category, dominating in the 100m, 200m, 400m, long jump, hammer throw, and relay. Capt Dania James showcased exceptional skills in the under 35 years female category, earning four gold, three silver, and two bronze medals across various events including sprints, throws, and badminton.
