India's Space Vision 2047 Pursuing a Phenomenal Dream

Dr. B. R. Guruprasad

The six-decade old Indian space programme has seen major changes as well as outstanding successes in the recent past. Once planned and implemented in the state sector, the government's decision in 2020 to invite the private sector to significantly participate in India's space programme was a paradigm shift indeed.

New Initiatives

This policy decision of the government was strongly influenced by the need to utilise the country's potential to the fullest possible extent to offer valuable space-based services, both domestically as well as globally. The subsequent publication of India's Space Policy Document in 2023 clearly delineating the role of Indian Space Research Organisation, the private sector, the newly created commercial arm of DOS called New Space India Limited (NSIL) and hand holding and regulatory body IN-SPACe, further emphasised the seriousness of the government to bring in private sector to contribute meaningfully to India's space capabilities for significantly enhancing India's share in the global space economy.

Significant Successes

The government's confidence in India's space capabilities as well as the potential is affirmed by ISRO's recent notable successes in space exploration domain that caught the attention of not only our countrymen but the global community as well. More importantly, it has enabled the government to envision a far more

capable and robust space ecosystem for the country by 2047.

On July 14, 2023 India's most powerful launch vehicle LVM3, which had earlier successfully placed 72 satellites for the UK based global communication satellite service provider OneWeb, flawlessly launched the 3900 kg Chandrayaan-3 spacecraft into a preliminary orbit around the Earth.

About two weeks later, India's workhorse PSLV launcher placed seven Singapore satellites in the required orbit. But these successes were outshined on August 23, 2023, with the gentle and perfect touchdown of Vikram lander of Chandrayaan-3 in the South Polar region of the Moon. This was historic indeed, making India the first country to land in that difficult region. This event glaringly revealed India's space prowess.

To top it off, about a week later, India's trusted workhorse launch vehicle PSLV triumphed again and placed Aditya-L1 spacecraft in the intended preliminary orbit around the earth. Later, PSLV achieved success again by launching India's X-ray polarimetry satellite XPOSAT on January 1, 2024.

A few days later, Aditya-L1, carefully navigated by ISRO scientists, reached a so called 'halo orbit' around L1 Lagrangian Point. This is the final destination of Aditya-L1 lying at a distance of about 1.5 million (fifteen lakh) kilometers from the earth. Thus, Aditya acquired the ability to conduct round the clock solar observation.

Careers in Space Sector

Public Relations, Media and Communication

Deepthi Subba

Humans have harboured a fascination with the stars for millennia. This cosmic curiosity took a monumental leap on October 4, 1957, when the then USSR launched Sputnik, the first human-made satellite. Since then, our quest to explore the final frontier has evolved from a military space race to a platform for scientific discovery and, more recently, commercial ventures.

When we think of careers in space, the image of an astronaut often springs to mind, evoking visions of heroic Star Wars-like adventures unfolding in the galaxy. But just as the Rebel Alliance needed more than just Jedi and pilots, the space sector offers a galaxy of opportunities far beyond astronomy, engineering, and computer science. For those with diverse educational backgrounds, there are numerous non-engineering, non-scientific roles that are

crucial to the success of space missions. Whether you're a communications wizard like C-3PO or a strategic mastermind like Princess Leia, here's a glimpse into how you can chart your own path in the space sector, regardless of your educational background.

India's journey into the space began with Aryabhata in 1975 and since then, the Indian Space Research Organisation (ISRO) has achieved numerous milestones, including the Mars Orbiter Mission (Mangalyaan), Chandrayaan-3 mission to the Moon and most recently the Aditya L1 Mission. The journey has been nothing short of epic, reminiscent of the grand space odysseys we adore in our favourite science fiction sagas. When we think of space exploration, it's easy to conjure images of Astronauts and cutting-edge technology. Yet, behind these high-tech endeavours lies a crucial, Public Relations (PR) often unsung heroes. In India's burgeoning space sector, PR plays an

Breaking Barriers

Space Kidz India and the Future of Space Education

INTERVIEW

With Space Day approaching, it is the perfect time to explore Space Education. In conversation with Smt. Neha Tripathi for Employment News, Dr. Srimathy Kesan, the visionary behind Space Kidz India, an organisation igniting passion for Space Science among young minds speaks about how they have transformed what was once seen as a distant dream into a tangible reality for many young enthusiasts through innovative programmes and hands-on experiences. From the conversation:

Q. Space exploration is often seen as a distant dream. How does Space Kidz India bring the cosmos closer to the everyday lives of children?

A. Space exploration often feels distant, but Space Kidz India bridges this gap for children. In 2009, at a tourism expo in Miami, I discovered space camps at Kennedy Space Center, NASA. These camps offered activities like satellite building and experiencing zero gravity, sparking my interest. As an ambassador, I took children to three NASA centers for these camps. Initially met with skepticism, the success of the first camp built trust among schools and parents. Later, as an ambassador to European Space Agency (ESA) and Yuri Gagarin Cosmonaut Training Center (GCTC), I expanded these educational journeys.

We then focused on building student satellites, selecting High School students to create

and launch a satellite. Despite challenges like securing resources and permissions, we succeeded. Our first NSLV, BalloonSAT, launched in 2015, marking our entry into the space industry and gaining popularity among students. This success inspired confidence, accelerating interest in space exploration. Over the years, I have met nearly a million students globally, nurturing their interest in space.

Q. Given Space Kidz India's impressive track record and being the first organisation in the world to do so with High School and College students, how have you managed to foster such a high level of interest and skill in Space Science among young students?

A. We were in the right place at the right time, and destiny led me into this industry, which I'm passionate about. Our emphasis on cost-effective and successful missions that offer hands-on experience naturally drew more students. Now, we have children from all over the world collaborating with us.

The Government of Rajasthan enlisted us to train students and launch three NSLVs. The Seychelles government invited us to work with their children on an NSLV mission. We've partnered with AVS Academy from the US on a suborbital mission, and they have a payload on our upcoming orbital mission, SR0, set to launch on August 15, 2024. Additionally, students from Singapore, Thailand, and Indonesia have worked with us

on the FunSAT mission.

Our missions, AzaadiSat.1 and AzaadiSat.2, have significantly boosted female participation in Space Science, encouraging more girls to join is a goal I am committed to achieving.

Q. What are some of the most surprising or unexpected skills children develop through participating in Space Kidz India programmes?

A. Space Kidz India is recognised globally for space education and student satellite building, but our impact goes beyond these fields. Our flagship initiative, Young Scientist India, is a National Innovation Challenge that identifies and mentors talented children from humble backgrounds. Winners receive financial aid, mentorship and opportunities to attend workshops at prestigious institutions like MIT, Harvard, NASA and GCTC.

Mr. Rifath Sharook, the first participant of this challenge, is now our CTO and has collaborated with me on 26 space missions. Other passionate participants include Yagna Sai, Gobinath, Keerthan, Clinton, Dhruv Sangal, Siva Soorya, and Uchith, who've stayed connected with us for 12 years.

Rohith, another winner, founded the successful drone startup, RohSpace. Ms. Shaina, the 2021 winner, launched the GroSave app. Ryan is a drone pilot for the TN Police Academy and Shahzeb Khan founded a drone-based medicine and food transport startup. Sathappan works with Rolls Royce, Rachen with a leading US chip manufacturing firm and many others are engaged in global research.

As we mark the 10th edition of the challenge this year, we eagerly anticipate discovering and nurturing more innovators.

Q. How do you think participating in space-related projects helps children in their overall personal development, beyond just academic growth?

A. To fully understand Earth, we must explore space and hands-on experience is key. Space exploration is costly, so we've designed missions that allow children to engage directly. The Near Space Launch Vehicle (NSLV), or "BalloonSAT," is the first significant step, enabling students to build devices that reach the stratosphere, collect data and capture images. This

experience often inspires further interest in suborbital and orbital projects.

The FunSAT mission, launched by Skyroot's private rocket, teaches children about payload construction and data interpretation, deepening their understanding of space. Establishing Space Parks, similar to those at NASA and ESA, where children can experience zero gravity and work with rovers and robotics, would greatly boost their curiosity and engagement. I have advocated for such facilities at every opportunity, including presenting the idea to the Honourable Prime Minister, as they are crucial for fostering interest and advancement in Space exploration within the country.

Q. Can you share some unique or unconventional teaching methods you use to make Space Science fascinating for kids?

A. One unique teaching method involved the KalamSAT suborbital mission, our first attempt at sending something into space. We used unconventional testing approaches:

- My kitchen became our lab.
- My dining table served as the assembly area.

Bureau of Indian Standards

Department of Consumer Affairs
Ministry of Consumer Affairs, Food & Public Distribution, Govt. of India
Manak Bhavan, 9 Bahadur Shah Zafar Marg, New Delhi-110002

INDICATIVE ADVERTISEMENT NO. 02/2024/ESTT (DEPUTATION)

Bureau of Indian Standards (BIS), a statutory body under the Ministry of Consumer Affairs, Food and Public Distribution, Department of Consumer Affairs, Govt. of India and responsible for activities in the field of Standardization, Product and System Certification, Hallmarking of Gold/Silver Jewellery, Laboratory Testing, etc. in the country, INVITES application from the ELIGIBLE serving employees of Central Govt./State Govt./Union Territory Govt./Statutory/Autonomous Body/Public Sector Undertaking (PSUs)/Reputed Govt. Agency, for filling up of vacancies in the posts of **Deputy Director (Administration & Finance)**, **Deputy Director (Marketing & Consumer Affairs)** and **Deputy Director (Publication)** on Deputation Basis.

The details of filling up of vacancies in the post of Deputy Director (Administration & Finance), Deputy Director (Marketing & Consumer Affairs) and Deputy Director (Publication) on DEPUTATION BASIS at BIS Headquarters, New Delhi and its offices located in the country are given below:

Sl. No.	Name of the Post & Level in Pay Matrix	No. of Vacancies	Place of posting & Vacancies
1.	Deputy Director (Administration & Finance) Level-11 (Rs. 67700-208700)	03	Delhi/NCR (02) Chennai (01)
2.	Deputy Director (Marketing & Consumer Affairs) Level-11 (Rs. 67700-208700)	04	BIS-HQs, New Delhi (01) Chandigarh (01) Mumbai (01) Kolkata (01)
3.	Deputy Director (Publication) Level-11 (Rs. 67700-208700)	01	BIS-HQs New Delhi (01)

How to Apply:

- The last date of receipt of application is 45 days from the date of release of Advertisement in the Employment News/Rozgar Samachar.
- Please refer the detailed advertisement available under the tab "Career Opportunities" at home page of the BIS website: www.bis.gov.in

India's Space Vision 2047: Pursuing a Phenomenal Dream ...

Envisioning a Giant Leap

These successes further encouraged the government to develop a vision about a far more robust Indian space sector for the future by pursuing the highly challenging human spaceflight programme 'Gaganyaan' with more intensive effort leading to a space station by the end of this decade, human landing on the Moon by India in 2040 and a base on the Moon by 2047. Thus, what is termed as India's 'Space Vision 2047' is a reflection of the government's awareness about its growing space prowess and is in line with the government's vision and aspiration to transform the country into an economy with a tenfold increase in GDP and a global hub of innovation and a thriving digital technology by 2047.

The signing of *Artemis Accords* by India in 2023 can be viewed as a crucial step towards realising the human lunar exploration dream. The NASA-led *Artemis* programme intends to establish a sustainable human presence on the Moon through renewed lunar exploration and in-situ utilisation of lunar resources. The proponents of *Artemis* believe that the Moon can act as valuable training ground and refuelling point for human explorers proceeding towards Mars and beyond.

India's Space Capabilities

India has the end-to-end capability to design, develop, build, test, launch and keep satellites under control as well as to utilise them. This has been painstakingly developed over a period of five decades amidst formidable challenges and testing circumstances. The satellites built in and launched from India are playing a vital role in the smooth functioning of our economy as well as ensuring the comprehensive security of our country.

In the 1990s, India began providing satellite-based services using its IRS and INSAT satellites as well as launch services using PSLV to the global community. And in the first decade of the millennium, India confidently built and launched Chandrayaan-1 spacecraft to explore the Moon.

By accommodating a total of six more scientific instruments from NASA, European Space Agency and Bulgaria in Chandrayaan-1 besides its five scientific instruments, ISRO exercised leadership role in its maiden mission to explore another heavenly body. And, one of them made a pathbreaking discovery of conclusively detecting water on the Moon for the first time.

Besides, a box like gadget called MIP that weighed about 37 kg at launch detached from Chandrayaan-1 as the latter orbited the Moon and a little later, MIP hit the lunar surface thereby making India only the fourth individual country to reach the lunar surface.

Buoyed by the success of Chandrayaan-1, ISRO planned and went ahead with Chandrayaan-2 mission amidst a string of challenges. Having acquired rich experience in orbiting a spacecraft around the Moon and in making a probe to 'hard land (hit)' the lunar surface during Chandrayaan-1, the next logical step, Chandrayaan-2, was built to make a 'soft landing (gentle touchdown)' on the lunar surface.

Road to Success

Unfortunately, Chandrayaan-2's Vikram lander could not accomplish that arduous task though it was working fine till when it was just about 2 km from the Moon's surface. Space is an unforgiving domain indeed with the dividing line between success and failure is extremely thin. This has become glaringly apparent in the past one year as spacecraft missions to Moon from Russia, US and Japan have completely or partially failed at different stages.

Though lunar soft landing could not be accomplished with Chandrayaan-2, the orbital module of that spacecraft equipped with eight Indigenous payloads (scientific instruments), has performed an astounding job by sending abundant information that includes images from cameras, radar and spectrometers that vividly detail various interesting aspects of the Moon.

Chandrayaan-3: Phenomenal Achievement

What could not be accomplished in Chandrayaan-2 was spectacularly achieved by Chandrayaan-3 through the perseverant effort of ISRO as the world watched it live. After making a pioneering soft landing in the South Polar region of the Moon, India also demonstrated its technological ability to make a rover (Pragyaan, a wheeled robotic vehicle) to move freely in the vicinity of the landing site. Besides, through in situ exploration of the Moon from Vikram lander as well as the mobile Pragyaan rover, India demonstrated its ability to skilfully collect scientific data from the lunar surface.

Furthermore, the Vikram lander underwent a 'hop test' when it successfully lifted off from the lunar surface, rose a little bit, moved horizontally and again landed. This was performed to test the ability of a spacecraft to begin the first phase of its return journey to earth. With ISRO contemplating Chandrayaan-4 lunar soil and rock sample return mission and aspiring to land humans on the Moon by 2040, this was a little, yet important, success indeed.

It may be recalled that Chandrayaan-3 consisted of a propulsion module, Vikram lander mounted on top of it and Pragyaan rover safely cocooned inside the belly of Vikram. And it was the propulsion module that carried Vikram to Lunar orbit and later Vikram leading an independent life there before landing.

As Vikram and Pragyaan successfully reached the Lunar surface, the propulsion module of Chandrayaan-3 remained in Lunar orbit and began observing the distant earth. In yet another pioneering feat, ISRO has successfully brought propulsion module back from Lunar orbit to Earth orbit. This also augurs well for the future Chandrayaan-4 as well as the vision to land humans on the Moon by 2040 and bring them back safely.

Undoubtedly, success of Chandrayaan-3 is a key factor that positively influenced the government in the formulation of India's Space Vision 2047. And subse-

quent successes of ISRO also contributed to it to varying extent.

Foray into Human Spaceflight Domain

With its vast experience in uncrewed spaceflight domain including lunar exploration, India has now boldly embarked on human spaceflight mission, the maiden step of which is Gaganyaan. This envisages the sending of Indian space travellers in an Indian built spacecraft onboard an Indian rocket vehicle launched from the Indian soil.

Much before the governmental approval was accorded for Gaganyaan in 2018, many enabling technologies were developed, especially related to the re-entry and recovery of a human carrying spacecraft. In the post approval phase, ISRO has accelerated its efforts to realise Gaganyaan as early as possible, but firmly keeping a vigilant eye on the safety of Gaganyaan space travellers (sometimes popularly referred to as gaganauts or vyomanauts).

Gaganyaan is being endeavoured in India as a national mission with many national research establishments, academia and industry joining hands with ISRO in this challenging task that can become the next giant leap for India, technologically. It is expected that the valuable experience gained through Chandrayaan and Gaganyaan programmes should lead towards the establishment of an Indian Space Station in Earth's orbit by the end of the decade and much later, India's human landing on the Moon in 2040 and establishment of the country's base on the Moon by 2047.

Perseverant Efforts

As part of Gaganyaan, ISRO is now 'human rating' (making it highly reliable and safer for humans to travel) LVM3, which is the most capable of its launch vehicles, to carry Gaganyaan spacecraft into an earth orbit of about 400 km. The Gaganyaan is a 8 tonne spacecraft capable of accommodating three humans and can remain in earth orbit for about a week and bring them back safely.

The spacecraft is also in quite an advanced stage of development with its environment and life-support system being given utmost attention, since these provide the comfortable ambience and safety to Indian space travellers to live in the weightless environment of space.

Besides, 'abort tests' have been successfully conducted to test our ability to quickly terminate the Gaganyaan spacecraft's ascent into space and to ensure the safety of the astronauts either on the launch pad itself or when the rocket vehicle carrying spacecraft is speeding towards space. This is to manage any emergency during the spacecraft's ascent to orbit.

Career Opportunities in the Indian Space Ecosystem

Being one of a handful of major spacefaring nations with a vibrant space programme, our country has provided many opportunities for educated Indians to serve its space programme in various capacities. About 19,000 people work in various establishments of the Department of Space (DOS), including ISRO. Besides, probably many thousands work in private sector which has provided many services to ISRO including parts and components for Indian satellites and launch vehicles in the past five decades. This sector began playing a more active role before the announcement of reforms by the Government in 2020. After these reforms, space startups have mushroomed and career opportunities got enhanced for aspirants with technical background.

DOS establishments like ISRO provide career opportunities in both technical and non-technical areas. Opportunities are more for aspirants with a background in different Engineering disciplines with a minimum of a Bachelor's Degree. Possession of a Master's Degree or a Doctoral Degree will definitely have more advantages both from recruitment and career progression points of view. Post Graduates in possession of a Master's Degree in Science and Mathematics or a Ph.D in those subjects will also find opportunities to join Indian space programme, but their opportunities are relatively limited. Similarly, there are limited opportunities for people with industrial training, diploma and bachelor's degree in science to be recruited as assistants and technicians.

In the non-technical or administrative area, people with a minimum of a Bachelor's Degree in Arts, Commerce and allied disciplines will have the opportunity to be recruited as Officers as well as Assistants and those with such degrees and secretarial qualification will have the opportunity to be recruited as Junior Personnel Assistants or Stenographers.

Irrespective of the grade, opportunity to work in the Indian Space sector has enough thrill and excitement.

Selection of 'Gaganauts'

Equally important and more conspicuous is the selection of four IAF test pilots - Group Captains Prashant Nair, Ajit Krishnan, Angad Pratap and Wing Commander Shubhanshu Shukla - as the first Gaganyaan astronaut candidates. Yet another significant development in this regard is the recent selection of Wing Commander Shubhanshu Shukla, the youngest amongst the four, as the man to fly to the largely US led International Space Station in early 2025 onboard an American rocket before the first crewed launch of Gaganyaan. This signifies the close cooperation of India and the United States in space sector and the valuable experience it offers to India in the human spaceflight domain.

Advantage of Artemis Accords

Here it is pertinent to recall that the US is endeavouring to return to Moon through its *Artemis* programme with the participation of like-minded countries. Sensing the advantages it offers, India signed the *Artemis Accords* in 2023. With its demonstrated capabilities in lunar exploration, India can benefit in many ways by participating in *Artemis* programme to carefully and effectively leverage its space capabilities. This will definitely be helpful for India's plan to land Indian space travellers on the Moon by 2040 and establish a lunar base by 2047 when the country will be celebrating the centenary of its independence.

Thus, the burgeoning Indian space programme is gearing itself up towards the realisation of 'Space Vision 2047' through a series of logical and incrementally challenging steps. Beginning with the continued robotic exploration of the Moon including a sample return mission in the late 2020s and then searching and quantifying the presence of water in the lunar polar region jointly with Japan through LUPEX mission, the subsequent Chandrayaan missions will proceed further to test the technologies and techniques essential for more focused and sustained human exploration of the Moon.

Transforming Vision to Mission

Along with these, India's maiden human spaceflight programme Gaganyaan will serve as the stepping stone to human space exploration programme of the country in Earth orbit, leading to the beginning of the establishment of a *Bharatiya Antariksh Station* (Indian Space Station) around the end of this decade. As per the current visualisation, this will enable the country to move towards the targeted human lunar landing by India by 2040 after which it is planned to further progress towards the establishment of an Indian lunar base by 2047, thereby realising the 'Space Vision 2047' as the country achieves a more significant political, economic and technological status thereby making more than a billion Indians proud of their ancient heritage and contemporary capabilities.

The challenges of realising this vision are myriad. Dedication and perseverance are the paths to realise this great dream. The country has to carefully forge ahead with single minded devotion to achieve such greater heights in the domain of space.

Continued from page 1

Careers in Space Sector : Public ...

indispensable role in shaping public perception, securing funding and fostering international collaboration. As we stand on the cusp of a new era in space exploration, the role of PR, Media and communication become even more pivotal in the following ways:

Bringing Space Closer to Home: Space exploration impacts life on Earth in profound ways. Early satellites paved the way for advancements in telecommunications, GPS, and weather forecasting. Today, we benefit from solar cells, improved medical research and even the UV filters in our sunglasses—all thanks to space technology. Some of these technological advancements are not just scientific triumphs; they are lifelines for humans on earth. Weather satellites provide critical data for farmers, helping to predict monsoons and avoid crop failures. Telecommunication satellites bridge the digital divide, bringing connectivity to remote regions. As space exploration continues to drive technological progress, PR ensures that the public understands and appreciates these benefits.

Navigating Challenges with PR: Space exploration is fraught with challenges, both governmental and public. High costs, regulatory hurdles and international competition are significant obstacles. For instance, ISRO's budget, though modest compared to NASA, still demands careful justification to taxpayers and government officials. Moreover, public understanding of space exploration's value is often limited. Many see it as an extravagant pursuit rather than a vital driver of innovation. This is where PR steps in. By effectively communicating the tangible benefits of space missions, PR professionals help garner public support and secure necessary funding.

The Power of Storytelling: James Ollerenshaw, a marketing leader experienced in AI, robotics and space, highlights a critical issue: "Amongst the public, there's a lack of awareness and appreciation for what the space industry brings to life". Much like the early days of aviation, when air travel was seen as a luxury for the elite, space exploration is often misunderstood. PR professionals have the unique ability to change this narrative. By sharing compelling stories of how space technology improves everyday life, they can shift public perception. Social media platforms amplify these stories, reaching millions in seconds and fostering a deeper connection between the public and space exploration.

A Bright Future: India's space sector is poised for exciting developments. Visionaries like Elon Musk envision a future where space tourism is commonplace. However, the real game-changer lies in the advancements in satellite technology and launch systems. PR will be crucial in highlighting these achievements and securing the support needed to propel India into a leading position in global space exploration. Public Relations not only drives awareness of these innovative schemes but also prepares for the inevitable ups and downs of pioneering ventures. By maintaining a transparent and engaging dialogue with the public, PR professionals ensure that space exploration continues to inspire and benefit society.

So, remember that it's not just the Scientists and Engineers who make these missions possible. It's also the Storytellers, the Communicators and the PR professionals who bring these incredible journeys to life for all of us

here on Earth.

The Diverse Roles of PR and Communication Experts in the Space Sector

The space sector requires a diverse array of communication and multimedia experts to engage the public, secure funding and foster international collaboration. Here's a deeper dive into the various roles and the skills and educational pathways needed for each.

Public Relations Specialists

PR Specialists craft comprehensive communication strategies to promote space missions and initiatives. These strategies ensure consistent messaging across various platforms and target different audience segments, including policymakers, investors, the scientific community and the general public.

ISRO's Chandrayaan-3 mission is a prime example of effective communication strategy. The mission was not only a scientific and technical success but also a PR triumph. ISRO's PR team effectively communicated the mission's objectives, progress and successes through press releases, social media updates and public engagement activities. This created widespread national pride and global recognition for India's space capabilities.

Moreover, space missions are inherently risky and not all go as planned. PR Specialists are responsible for handling crisis communications when things go wrong. They must provide timely and transparent information to the public and media, manage the organisation's reputation and mitigate potential fallout. For example, during the Chandrayaan-2 mission, ISRO's PR team managed media relations meticulously. Despite the partial failure of the mission viz. the Vikram lander's crash landing, the media coverage remained largely positive due to the transparent and proactive communication by ISRO's PR Specialists. The team highlighted the mission's scientific achievements and the data gathered by the orbiter, thereby maintaining public trust and enthusiasm.

Effective PR has also helped India's space missions gain global attention. International media coverage of ISRO's achievements has positioned India as a key player in space exploration. The announcement of future missions, such as the Gaganyaan human spaceflight programme, has been strategically communicated to garner global interest and support.

Key Skills:

- Strong writing and communication abilities
- Excellent interpersonal skills
- Media relations expertise
- Crisis management skills

Pathway:

A Bachelor's degree in communications, journalism, public relations, or a related field is typically required. Internships or experience in media and public relations can be highly beneficial.

Technical Writers

Technical Writers play an essential role in the space sector by translating complex scientific and technical information into accessible content for a broader audience. They document processes, create manuals and develop content that explains intricate space technologies. This work is crucial for the successful dissemination of knowledge, the training of personnel and the education of the public.

Technical Writers meticulously document every step of space missions and technological developments. This includes creating detailed reports on mission planning, execution and outcomes. These documents serve as

valuable references for current and future projects.

Technical Writers create user manuals, maintenance guides and operational handbooks for various space technologies. These manuals are crucial for training Engineers, Scientists and Operators who work with complex space equipment and systems.

Technical Writers also develop educational content that explains intricate space technologies and scientific concepts to non-experts. This content is used in educational programmes, public outreach and media communications to enhance public understanding and support for space missions.

Key Skills:

- Exceptional writing skills
- Attention to detail
- Ability to grasp and convey technical concepts clearly

Pathway:

A Bachelor's degree in English, technical writing, or a related field, along with experience in technical documentation, is typically required.

Photographers and Videographers

Photographers and Videographers play a crucial role in the space industry by capturing the visual journey of space missions. Their work begins long before a mission's launch, often documenting the meticulous development phases where Engineers and Scientists design, build and test spacecraft and related technologies. These visuals provide a detailed chronicle of the innovation and hard work that goes into preparing for space exploration.

During the pre-launch phase, Photographers and Videographers document critical milestones such as the assembly of spacecraft, testing of components and integration of different systems. This stage often involves capturing intricate details of the engineering process, the collaboration between various teams and the implementation of cutting-edge technology. These images and videos not only serve as historical records but also as valuable tools for Engineers and Scientists to review and refine their work.

As the mission progresses to the launch phase, Photographers and Videographers are on-site to capture the dynamic and dramatic moments of the spacecraft being transported to the launchpad, the final checks and the countdown to liftoff. The launch itself is a particularly challenging event to capture due to its rapid pace and the need for precision in timing and positioning. High-resolution cameras and advanced videography techniques are employed to document the ignition, liftoff and the rocket's ascent, providing breathtaking visuals that convey the power and excitement of space exploration.

Once the spacecraft is in space, Photographers and Videographers may work with satellite imagery and data from onboard cameras to continue documenting the mission. This can include images of the spacecraft in orbit, the deployment of instruments, and the exploration of celestial bodies. These visuals are essential for communicating the progress and achievements of the mission to both the scientific community and the general public.

The work of Photographers and Videographers extends beyond the technical aspects of space missions. They also capture the human element, documenting the people behind the missions—Engineers, Scientists and Astronauts—highlighting their dedication, expertise and the challenges they overcome. This storytelling aspect helps to humanise the complex and often abstract world of space exploration,

making it more relatable and inspiring to a broader audience.

Key Skills:

- Proficiency in photography and videography
- Creativity
- Technical skills in using cameras and editing software

Pathway:

A High School Diploma or equivalent is the minimum requirement, often supplemented by long-term on-the-job training or a degree in photography, videography or media production.

Graphic Designers and Illustrators

Graphic Designers and Illustrators play a pivotal role in supporting space missions by creating visual content that effectively communicates complex information and enhances public engagement. Their work encompasses a wide range of tasks, each contributing uniquely to the overall success and outreach of space missions.

One of the most iconic contributions of Graphic Designers in the space industry is the creation of mission patches. These patches serve as symbolic representations of specific space missions and are worn by astronauts and team members. Each design is carefully crafted to encapsulate the mission's objectives, key elements, and the spirit of the team involved. Designers incorporate various symbols, colors and typography to create patches that are not only visually appealing but also meaningful. The process often involves close collaboration with mission teams to ensure that every detail reflects the mission's goals and significance.

Graphic Designers and Illustrators are essential in developing educational materials that make space science and exploration accessible to a broader audience. They create visually engaging content for textbooks, online courses and interactive learning platforms. This includes detailed diagrams of spacecraft, planetary systems and scientific phenomena that help students and enthusiasts understand complex concepts. By translating technical information into visually palatable formats, Designers facilitate learning and inspire the next generation of space explorers and scientists.

Infographics are powerful tools used to communicate data and information about space missions in a clear and concise manner. Graphic Designers create infographics that break down intricate data sets, mission timelines, and technical details into easily understandable visuals. These infographics are often used in press releases, social media and presentations to convey key information quickly and effectively. They help bridge the gap between scientific data and public comprehension, making it easier for people to grasp the significance of space missions and discoveries.

Illustrators often collaborate with Scientists and Engineers to visualise abstract scientific concepts and future space missions. These visualisations can include artist renderings of planets, spacecraft and celestial events that have not been captured by cameras. By creating accurate and imaginative representations, Illustrators help bring theoretical concepts to life, aiding in both scientific communication and public engagement. These visuals are used in research publications, exhibitions, and educational outreach programmes to illustrate what cannot yet be seen.

Graphic Designers are also instrumental in developing the branding and visual identity of space missions and organisations. This includes designing logos, promotional materials and

DELHI DEVELOPMENT AUTHORITY

VACANCY NOTICE

V.N. No -08/2024/PB-I/DDA

Sub: - Filling up 01 selection post of Dy. CLA (Level-12 in the Pay Matrix as per 7th CPC) in DDA on Deputation basis.

Delhi Development Authority invites applications in the prescribed format from the eligible officers working in Central Government/ State Government/ Semi-Govt./ Union Territory Administrations/ Statutory Organizations/ Public Sector Undertakings/ Autonomous Bodies for filling up 01 post of Dy. Chief Legal Advisor in PB-3, Rs. 15600-39100 with Grade Pay of Rs. 7600/-, (Level-12 in the Pay Matrix as per 7th CPC) on deputation basis in DDA in accordance with the following provisions of the recruitment rules:-

"From amongst the officers dealing with Legal Affairs/matters under the Central/State Govt./Public Sector Undertakings/Semi-Govt./Autonomous or Statutory Bodies:

- (a) (i) Holding analogous posts on regular basis in the cadre/parent department; or**
(ii) With 5 years service in posts in the Pay Band-3, Rs. 15600-39100 with Grade Pay of Rs. 6600/- or equivalent;

and

- (b) Possessing Regular Degree in Law (entitling the incumbent for Registration at Bar and appearing before the Courts) from a recognized University or equivalent and preferably having experience of dealing with land acquisition, transfer of property, revenue and Service matters etc.;"**

Note: The transfer of deputation shall be initially for a period of **01 year** which is extendable up to 5 years on year to year basis as per guidelines issued by DoPT. The Terms and Conditions of deputation shall be governed by the provisions mentioned in the OM dated 17th June, 2010 and as amended from time to time.

General Conditions:

- Candidates should apply through Cadre Controlling Authority in the parent department in the proforma prescribed by DoPT vide OM No. F. No AB.14017/28/2014-Estt.(RR) dated 02.07.2015 enclosed herewith, along with relevant documents. The Cadre Controlling Authority should also fill up "Certificate by the Employer/Cadre Controlling Authority" invariably which is a part of prescribed application format.
- The application in the prescribed proforma should be forwarded by the concerned Cadre Controlling Authority certifying that the details furnished by the candidate are correct as per records.
- The applications received after the last date of receipt shall not be entertained under any circumstances.
- The period of deputation shall be initially for 01 year extendable up to five years on year to year basis, which may, however, be terminated at any time before completion of period/extended period at the discretion of the Delhi Development Authority.
- The Pay and allowances and other conditions of deputation of the officers selected on deputation shall be regulated in accordance with the Department of Personnel & Training's OM No. 6/8/2009-Estt. (Pay-I) dated 17.06.2010 and as amended from time to time.
- The APARs for the last five years duly certified by the Group 'A' Officer in the parent department along with latest vigilance clearance report indicating the pending and settled disciplinary/criminal cases and the details of penalties imposed, if any, should also be furnished.
- The level of responsibilities and duties of cadre post of the applicants should be comparable to the duties and responsibilities of the ex-cadre post.
- It may be noted that the substantive pay scale/ pay band + Grade Pay/ Level in the pay matrix should be mentioned in the application as only the substantive post and pay scale/ pay band + grade pay/ level in the pay matrix will be considered by DDA. The financial up-gradation under ACP/MACP/NFSG/NFU etc. should be shown separately.
- In case, the pay structure is different from central government, the comparable pay structure to the central government based on the 7th CPC should be clearly mentioned.

The application, complete in all respect should reach the office of Commissioner (Personnel), Delhi Development Authority, E-1, Ground Floor, Vikas Sadan, New Delhi - 110023 on or before **27.08.2024**. Incomplete applications shall not be considered and will be rejected summarily.

Note 1: The Departmental Officers in the feeder category, who are in the direct line of promotion, shall not be eligible for consideration for appointment on deputation. Similarly, deputationists shall not be eligible for consideration for appointment by promotion.

Note 2: The period of deputation including period of deputation in another ex-cadre post held immediately preceding this appointment in the same or some other Organisation or Department of the Central Government shall ordinarily not exceed five years.

Note 3: The maximum age limit for appointment by deputation shall not be exceeding 56 years as on the closing date of receipt of applications.

2. The terms and conditions of deputation will be governed by the DoP&T's OM No. 6/8/2009-Estt.(Pay-II) dated 17 Jun 10 as amended from time to time.

3. It is requested that the applications (in duplicate) in the given proforma along with the complete and up-to-date confidential reports of the officers who could be spared in the event of their selection duly countersigned by the employer may be sent to the **Commodore (CP), Directorate of Civilian Personnel, Naval Headquarters, Ministry of Defence, Room No. 100, Talkatora Stadium Annex Building, New Delhi-110001 within 60 days of the issue of this Advt.** Applications received after the last date or without the confidential reports or otherwise found incomplete will not be considered. While forwarding the applications, it may be verified and certified that the particulars furnished by the officers are correct and that no disciplinary/vigilance case is pending. The details of major/minor penalties imposed on the officer during the last 10 years may also be furnished.

Annexure-I

Ministry of Defence (Navy)
Apprentice Training School
 Naval Ship Repair Yard, Port Blair-744102

ENROLMENT FOR APPRENTICESHIP TRAINING (IT-01 BATCH) 2024-25

1. Naval Ship Repair Yard (Port Blair) invites online applications on website from ITI qualified Indian National candidates (Male/ Female) for "Technician (Vocational) Apprentice Program for One Year (IT-01 Batch)" for the Training batch 2024-25 in accordance with Apprentice Act 1961 read in conjunction with Apprenticeship Rules 1992 as amended from time to time in eight designated trades for **50 vacancies** as per distribution shown below: -

Ser	Designated Trade	Relevant ITI Trade as per Schedule I of Apprenticeship Rules 1992 (*)	Vacancies
(a)	Fitter	Fitter	10
(b)	Information & Communication Technology System Maintenance	ICTSM/ITESM/Broad Based Basic Training in IT Sector under Centre of Excellence Scheme in Repair & Maintenance of computer & Peripherals.	03
(c)	Electrician	Electrician	10
(d)	Mechanic (Diesel)	Mechanic (Diesel)	06
(e)	Instrument Mechanic	Instrument Mechanic	05
(f)	Machinist	Machinist	06
(g)	PASA	Computer Operator & Programming Assistant	03
(h)	Welder (Gas & Electric)	Welder	07

(*) Apprenticeship Act 1961 and Apprenticeship Rules 1992 along with relevant schedule are available on website of Government of India, Ministry of Skill Development and Entrepreneurship at <https://www.msde.gov.in/en/about-msde/acts-and-rules>.

Note: - The number of vacancies mentioned above are only indicative and may change at a later stage during the final assessment of eligible candidates.

2. Eligibility Conditions

(a) **Nationality and Character.** Only Indian nationals can apply and be accepted into "Technician (Vocational) Apprentice Program for One Year -IT-01 Batch" at NSRY (Port Blair). The candidates should not have been convicted of offences or under trial or in the process to be chargesheeted or to be tried under any of the Indian laws or rules/ regulations of the educational institutions. Since NSRY (Port Blair) is a defence establishment, applications of candidates with questionable or suspicious antecedents would be summarily rejected without any intimation to the candidate and if the subsequent police verification does not provide a clean certificate, the selected candidature would be cancelled.

(b) **Qualifications.** The essential education qualification for admission into "Technician (Vocational) Apprentice Program for One Year, IT-01 Batch (2024-25)" at NSRY (Port Blair) is "passed" in respective ITI Trades (as per Schedule I of Apprenticeship Rules 1992) based on trade test results under NCVT or SCVT by Certificate issued by recognised ITI.

(c) **Age.** Minimum age limit is 18 years as on one day before the date of commencement of "Technician (Vocational) Apprentice Program for One Year, IT-01 Batch" at NSRY (Port Blair).

(d) **Standard of Physical Fitness.** The standard of Physical Fitness shall be as per Rule 4 and Schedule-II of Apprenticeship Rules 1992. Candidates are to attach medical certificate from any Government Hospital/ Dispensary to certify fitness as per Rule 4 and Schedule-II of Apprenticeship Rules 1992.

(e) **Previous Training.** Candidates who have already undergone or are currently undergoing Apprenticeship in the same trade under Apprentice Act-1961 as amended time to time in any Govt/ Public Sector/ Private Industrial Organization, are not eligible to apply for the current program.

3. Reservation of Vacancies.

(a) Reservation of vacancies will be as per Rule 5, Sub Rule (1) (amplification in Schedule II A) and Rule 5, Sub Rule (2) of Apprenticeship Rules 1992 as applicable in the Union Territory of Andaman & Nicobar Islands and as amended time to time.

(b) It is to be noted and clearly understood that while NSRY (Port Blair) located at Haddo, Port Blair is an equal opportunity provider and does not discriminate in the name of sex, race, caste, religion, place of birth or such other categorisations except otherwise as provided for in the law or the rules and regulations of the Union Territory of Andaman and Nicobar Islands, it is a defence establishment and is registered as a factory, which is engaged in activities considered 'risky, hazardous, physically demanding and arduous'. Accordingly, equal opportunities are provided and implemented considering and taking into account the nature of work and activities that NSRY (Port Blair) is engaged in, and 3% of vacancies are horizontally reserved for Persons with Disability who are otherwise eligible and meet the fitness relaxation criteria laid out in Rule 4 of Apprenticeship Rules 1992.

(c) 3% of vacancies are horizontally reserved for ex-serviceman, their children and children of Armed Forces Personnel as per Ministry of Labour, Directorate General of Employment & Training letter DGET-23(2)/87.AP dated 26 Mar 87, in the order of priority as per details below: -

(i) Children of deceased/ disabled ex-servicemen including those killed/disabled during peace time.

(ii) Children of ex-servicemen.

(iii) Children of serving Jawans.

(iv) Children of serving Officers.

(v) Ex-Serviceman.

4. Payment of Stipend to Apprentices. The rate of stipend payable to apprentices shall be Rs. 7000/- per month as per Ser 1 (v) of Para 5 of GSR 686(E) Apprenticeship (Amendment) Rule 2019 dated 25 Sep 2019 notified vide Gazette of India Notification No. 561 and as amended time to time. This is subject to registration of the candidate in portal '<https://www.apprenticeshipindia.gov.in>' and execution of valid apprenticeship contract as per requirement of NAPS Portal.

5. Merit List/ Selection Procedure. Candidates meeting the essential eligibility conditions as indicated at Para 2 above would be called for joining the program on merit list standing (including medical fitness) promulgated in <https://apprenticeship.rectindia.in/> and through online communication on their valid email IDs stated in writing by candidates on the respective application forms. Candidates are advised to check their email regularly.

(a) All candidates with valid application and meeting the essential eligibility conditions will be placed in a Merit List drawn out Trade and Category wise on the basis of their aggregate Percentage (%) of marks obtained in ITI trades and Std X. Where the number of applications received are too large/ more, number of online applications will be shortlisted as per merit up to the ratio 1:10 based on aggregate percentage (%) of marks obtained in ITI trades and Std X.

(b) In case of tie with same aggregate percentage (%) candidates' date of birth will be compared, and the elder person will be placed above the others. In case of further ties, (ascending) alphabetical order of the First name followed by the middle name followed by the surname of the candidates as mentioned in Std X certificate (starting from alphabet 'A' to 'Z') will be considered for deciding the order of merit.

(c) Candidates have to produce original documents before registration for verification. If any discrepancy found, the candidate will not be registered/ enrolled for apprenticeship.

6. Notices of Prospective Candidates. In case of any change in schedule of dates, amendment, etc. the same will be intimated through online website mentioned at Para 5 above only.

7. Commencement of Training, 01 Oct 2024 (tentative).

8. Travel/ Expenses. No travel expenses are admissible for candidates called for Document Verification & joining of Apprenticeship Training Program.

9. Boarding/ Lodging. Candidates called for document verification and apprenticeship training program are to arrange their own boarding and lodging. No accommodation will be provided to candidate by Naval Ship Repair Yard, Port Blair.

10. Filling up of Online Applications. Candidates are required to register online at <https://apprenticeship.rectindia.in/> and fill up online application. Further, the said website for filling online application would be opened from the **third day (1000 hrs) of publication of notification in Employment News and will remain open till 21 days after date of publication in Employment News (up to 2359 hrs)**. The candidates are also required to upload following good quality/ readable documents **duly scanned in colour in PDF only** in A4 size and file size up to 200 kb for filling up online application:-

(a) Passport size photo of candidate in **Blue background** (size 3.5 cm X 4.5 cm, file size up to 200 kb) in .JPEG/.JPG format.

(b) SSC/ Matriculation (Std X) mark sheet and proof of Date of Birth (Birth Certificate or Aadhaar Card).

(c) ITI mark sheet.

(d) Community Certificate for candidates seeking reservation as per Rule 5 Sub Rule (1) (amplification in Schedule II A) and Rule 5 Sub Rule (2) of Apprenticeship Rules 1992 as applicable in the Union Territory of Andaman & Nicobar Islands.

(e) Certificate of Physical Disability issued by competent authority for candidates seeking reservation under 'Persons with Disability' category and meeting the fitness relaxation criteria laid out in Rule 4 of Apprenticeship Rules 1992 in respect of the eight designated trades listed in Para 1 ibid of this advertisement.

(f) Certificate of applicability issued by competent authority in respect of candidates seeking reservation under the wards of Armed Forces Personnel/ ex-Serviceman and ex-Serviceman categories as per Para 3 (c) ibid of this advertisement.

(g) Aadhar Card of candidate (**Compulsory**) (file size upto 200 Kb) in .JPEG/ .JPG format.

(h) Self-photograph and photographs of other documents taken from mobile phones/ cameras and uploaded are **not acceptable**.

Continued from page 27

11. **Offer & Acceptance of Employment.** It shall not be obligatory on the part of Naval Ship Repair Yard, Port Blair to offer any employment to any apprentice after completion of the training nor shall it be obligatory for the apprentice to accept any employment, if offered by Naval Ship Repair Yard, Port Blair. The candidates can familiarize themselves with the rules and regulations under the Apprentices Act 1961 and the Disability Act 2016.

12. **Terms & Conditions.** During the training, the Indian Navy is not liable to provide medical treatment to apprentices, however the existing facilities of Naval Ship Repair Yard MI Room would be extended to ensure the treatment of apprentices due to any work or training related injuries. In case suitable treatment is not available at the MI room, the apprentice would be referred to GB Pant Hospital at Port Blair for further treatment.

13. **Clothing.** Apprentices on joining will be supplied with following or as revised from time to time:-

- Two pair of workshop overalls
- Two pair of non-skid shoes
- Two pair of safety gloves
- Safety goggle
- One safety helmet
- One pair of ear defender

14. **Compensation.**

(a) **Payable to Apprentice for Termination of Contract.** If the apprenticeship is terminated through failure on the part of the employer to carry out the terms and conditions of apprenticeship, the apprentice will be paid compensation in accordance with 'The Apprentices Act 1961' and the rules framed thereunder.

(b) **Payable by the Apprentices.** If the apprentices leave the training on his/ her own accord he is liable to pay compensation to the employer as determined by the Central Apprenticeship Adviser under 'The Apprentices Act 1961' and the Rules framed thereunder.

15. **General Information.** Applicants are advised to note the following instructions carefully: -

- Candidates are to apply online only through <https://apprenticeship.recttindia.in/>. No physical forms would be accepted.
- Mere submission of online application form, receipt of 'acknowledgement', receipt of online application does not guarantee enrolment for 'Designated Trades Apprenticeship Training'. The selection of candidates will be made based on merit list considering available vacancies category-wise, scrutiny of original credentials & medical test etc.
- Candidates are not required to send hard copy of application to NSRY (Port Blair). The same are to be retained by the candidates and produced at the time of document verification.
- Candidates are required to check the website <https://apprenticeship.recttindia.in/> for submitting online applications and for any updates & changes.
- Candidates are required to give their personal mobile number and valid e-Mail ID for receiving periodic notices/ updates.
- Canvassing of any kind will lead to disqualification of candidates. Selection process will be done strictly on merit. Candidates are advised not to fall prey to any unscrupulous elements.
- Any material suppression of facts or submitting forged certificates shall lead to rejection of candidature at any stage of the selection process and termination of apprenticeship.
- Decision of CSY, NSRY (Pbr) in all matters relating to the eligibility, acceptance/ rejection of any application will be final and binding on the candidate and no inquiry/ correspondence shall be entertained in this regard.
- Any subsequent changes in the terms and conditions of the engagement of Designated Trade Apprentices as per the extant rules will stand good. Indian Navy reserves the right to incorporate any subsequent changes/modifications/ additions in the terms & conditions under this advertisement notice as necessitated and applicable. Any corrigendum will be published on the website.
- Jurisdiction of any court case will be sitting bench of Calcutta High Court in Port Blair only.

16. **Rejection of Candidature.** Candidates are requested to read all instructions carefully & thoroughly before applying online. Their applications/ candidature are likely to be rejected due to one or more of the following reasons: -

Institute of Nanomedical Sciences

Maharaja Surajmal Brij University

Chak Sakeetra, Kumher, Bharatpur, Rajasthan - 321201

ADMISSION ANNOUNCEMENT : 2024-25

The convergence of nanotechnology and medicine has led to the interdisciplinary field of "Nanomedicine". Nanomedicine emerges as a beacon of hope, offering opportunities to diagnose, treat, and prevent diseases with unparalleled precision. By harnessing the unique properties of nanoscale materials, Nanomedicine pioneers breakthroughs in drug delivery, imaging, and therapeutics, promising to reshape the healthcare landscape. In Europe- \$1794 million, in USA- \$1264 million and in Japan \$1152 million are devoted to Nanomedicine research in each funding cycle. Join us on this transformative journey where boundaries blur, and possibilities are skyrocket, as we delve into the realm of Nanomedicine, where the future of medicine awaits discovery.

Institute of Library and Information Sciences

Maharaja Surajmal Brij University

Chak Sakeetra, Kumher, Bharatpur, Rajasthan - 321201

ADMISSION ANNOUNCEMENT : 2024-25

The Institute of Library and Information Sciences is the pioneer institute of the University to teach students about Library and Information Science. The goal is to train students for jobs like librarians, information officers, archivists, and knowledge managers. The university library serves as a learning lab where students get hands-on training with the help of experience faculty members and library staff. This way, they learn both theory and practical skills. The Institute is committed to provide quality education and produce skilled professionals in Library and Information Science to meet professional demands. Join us to learn latest tools and technologies in library and information management to keep pace with information trends.

Breaking Barriers : Space Kidz India and the Future ...

- We used a fan for spin tests.
- The fridge and boiling water were used for thermal vacuum tests.
- We conducted drop tests from my terrace.

While challenging to apply in orbital missions, these methods highlight our resourcefulness. For the AzaadiSat mission, we experimented with alternative components, resulting in valuable data that reinforced our confidence in thinking beyond the box. Organisations like ISRO, Hexaware Technologies and Ananth Technologies have been instrumental in supporting our missions.

Q. Are there any student-led projects that have gained recognition or have the potential to make a significant impact?

A. KalamSAT, our first suborbital mission, stands as a landmark with the creation of the lightest and first-ever 3D-printed satellite payload. It shifted focus toward space opportunities beyond ISRO, gaining recognition through extensive media coverage. This mission inspired countless students and sparked interest in space, resulting in accolades and fuelling numerous startups.

Another cherished project, AzaadiSat, featured 75 payloads built by 750 rural girls from government schools to celebrate India's 75th Independence. Initially unfamiliar with space, these girls became passionate space ambassadors. Some now aspire to be fighter pilots and Gaganauts, inspiring other countries to

engage young girls in space activities.

Hosting renowned figures like Wing Commander (Retd.) Rakesh Sharma, Cosmonaut Salizhan Sharipov and NASA Astronaut Marsha Ivins enabled us to inspire 50,000 children, encouraging many to dream of becoming Fighter Pilots and Astronauts.

Q. What career opportunities do you foresee for the youth of the country in the space sector?

A. Space is the future, with young talent set to revolutionise the industry. In 2015, I pioneered an initiative for building student satellites and promoting Space Education. Since then, the growth of numerous Space Education organisations signals industry expansion.

Key future areas include debris mitigation, sample returns from the Moon and

Mars and developing re-entry capsules, all crucial for future colonisation. With the success of the Gaganyaan mission, becoming an Astronaut may become a top aspiration for young people.

Space tourism, including zero-gravity flights, is on the rise and space advertising will soon be tested on the PSLV Orbital Experimental Module (POEM) platform of PSLV C60. Additionally, space could host unique experiences like engagement ceremonies and destination weddings, broadening opportunities for the next generation.

Q. If you could envision Space Kidz India in the year 2047, what would it look like? What futuristic projects do you hope to undertake?

A. By 2047, Space Kidz India envisions a transformative future celebrating 100 years of

freedom. More girls from rural and humble backgrounds will lead startups, engage in research, become scientists and even hold top roles like ISRO Chairman and Gaganauts.

Inspired by global gaps in the space ecosystem, I've initiated an ambitious project involving 108 countries. Aligned with India's "Vasudhaiva Kutumbakam"- the world is one family-we will launch "Mission ShaktiSAT." Each of the 108 countries will select one girl, totalling around 12,000 High School students, to receive online space training. One representative from each country will come to India to collaboratively build a lunar-orbit spacecraft.

I hope to secure the Hon'ble Prime Minister's approval to launch this unprecedented mission from ISRO. This groundbreaking endeavour will mark a unique, historic moment.

As we look ahead, the importance of nurturing young minds in space exploration can not be overstated. The tireless efforts of organisations dedicated to making Space Science accessible and exciting for children ensure that the next generation is well-equipped to push the boundaries of human knowledge. Through innovative programmes, hands-on experiences and a commitment to inclusivity, we are witnessing the creation of a new era of explorers and innovators who will undoubtedly shape our future in profound ways.

Careers in Space Sector ...

website graphics that ensure consistent and professional representation. Effective branding helps build public recognition and trust, enhancing the overall impact of the mission. Designers create visually compelling content for public outreach campaigns, including posters, brochures, and digital content, to engage and inform the public about ongoing and upcoming missions.

The role of Graphic Designers and Illustrators in space missions often involves close collaboration with various teams, including Scientists, Engineers, Educators and Public Affairs Specialists. This interdisciplinary approach ensures that the visual content is not only scientifically accurate but also engaging and informative. By working together, they create comprehensive visual strategies that effectively communicate the mission's story, goals and achievements.

Key Skills:

- Proficiency in design software
- Creativity
- Attention to detail

Pathway:

A Degree in graphic design, visual arts, or a related field, along with a strong portfolio of work, is typically required.

Social Media Managers

Social Media Managers are pivotal in crafting and executing strategies to engage audiences across diverse social media

platforms. They develop comprehensive plans to enhance visibility and interaction, tailoring content to each platform's unique features and audience preferences. Their role involves creating and curating a range of content, including updates on space missions, behind-the-scenes insights, and engaging multimedia posts. They also actively interact with followers by responding to comments, addressing questions and fostering discussions to build a

vibrant and informed community around space missions. Through these efforts, Social Media Managers help generate excitement, disseminate important information and cultivate a strong, engaged following that supports and amplifies the mission's goals.

Key Skills:

- Proficiency in social media platforms and analytics tools
- Strong writing and visual communication skills
- Creativity and adaptability

Pathway:**Event Coordinators**

Event Coordinators play a crucial role in planning and executing events related to space exploration, ensuring that each event effectively communicates the mission's objectives and engages the audience. They manage all aspects of event logistics, including venue selection, scheduling and coordinating with speakers and participants. For press conferences, Event Coordinators organise the setup for media interactions, prepare briefing materials, and handle technical requirements to ensure smooth coverage. Public lectures are meticulously planned to feature prominent Scientists and Astronauts, with Coordinators handling everything from promotional materials to audience engagement. Educational workshops are designed to provide hands-on learning experiences, requiring coordination with Educators and the development of interactive activities. By managing these events, Coordinators help foster public interest, disseminate important information and enhance the overall outreach of space exploration initiatives.

Key Skills:

- Strong organisational and project management skills
- Excellent communication and interpersonal abilities
- Attention to detail

Pathway:

A Degree in event management, communications, or a related field, along with experience in event planning, is typically required.

Conclusion

The space sector is a vast universe of opportunities for individuals from diverse educational backgrounds. Whether you excel in storytelling, project organisation, education, or visual arts, there is a place for you in the exciting world of space exploration. The key is to leverage your unique skills and find the right pathway to launch your career in this dynamic and inspiring field. By joining this cosmic endeavour, you contribute to humanity's quest to explore and understand the universe, one story at a time.

Dy. Director General of Forests

BEST ENTRY FOR

ISSUE DATED 27 July - 2 August 2024

Q. Prime Minister Shri Narendra Modi recently visited Moscow to attend the 22nd India-Russia Annual Summit. What are the major takeaways? K. Srinivas, New Delhi

The major takeaways from the 22nd India-Russia Annual Summit held in July 2024:

1. Special and Privileged Strategic Partnership: The summit reaffirmed the enduring and expanding partnership between India and Russia. Both leaders appreciated the trust, mutual understanding and strategic convergence that define this relationship.

2. Order of Saint Andrew the Apostle: Russian President Mr. Vladimir Putin conferred India's Prime Minister Shri. Narendra Modi with Russia's highest civilian honour for his significant contribution to bilateral ties.

3. Bilateral Trade Target: The two countries set a bilateral trade target of USD 100 billion by 2030.

4. Currency Settlement System: They agreed to promote bilateral settlement using national currencies, reducing reliance on foreign currencies.

5. Energy Cooperation: The summit emphasised expanding energy cooperation across nuclear, oil and petrochemical sectors including infrastructure and technology.

6. Foreign Office Consultations: The Foreign Ministries of both nations signed a protocol for consultations (2024-28) to address pressing bilateral, global and regional issues.

7. Resilience Amid Geopolitical Challenges: Despite complex geo-political situations, India-Russia ties remained resilient, with efforts to forge a contemporary, balanced and long-term partnership.

8. Regular Bilateral Engagement: Regular exchanges at various levels, including during India's Chairship of SCO and G20 and Russia's Chairship of BRICS, deepened the partnership.

9. Core Areas of Cooperation: The relationship spans political, strategic, military, trade, energy, science, technology, cultural and humanitarian cooperation.

10. Invitation for 23rd Summit: PM Shri Narendra Modi invited President Mr. Vladimir Putin to visit India for the 23rd Indo-Russian Summit in 2025.

Rajya Sabha Elections for 12 Vacant Seats Scheduled for September 3

The Election Commission of India (ECI) has announced that elections for 12 vacant Rajya Sabha seats will be held on September 3. Nominations must be filed by August 21, with scrutiny on August 22. Candidates can withdraw their nominations by August 26 in Assam, Madhya Pradesh, Maharashtra, and Tripura and by August 27 in Bihar, Haryana, Rajasthan, Telangana and Odisha. Polling will take place from 9 AM to 4 PM, followed by the counting of votes at 5 PM on the same day. The vacant seats are distributed across Assam (2), Bihar (2), Haryana (1), Madhya Pradesh (1), Maharashtra (2), Rajasthan (1), Tripura (1), Telangana (1) and Odisha (1).

Navy Chief Unveils Strategic Vision for "Viksit Bharat"

Indian Navy Chief, Admiral Dinesh K Tripathi has unveiled a strategic document, "CNS Course to Steer-2024 (CTS-2024)," outlining the Navy's role in contributing to a developed India, or "Viksit Bharat." The document sets forth key objectives for building a combat-ready, credible and future-ready navy, aligned with India's national development goals. Admiral Tripathi emphasised the importance of using CTS-2024 as a tool for managing change and safeguarding India's maritime interests. This is his first major policy initiative since becoming the Navy Chief in April. The unveiling coincides with the Navy's active international engagements, including recent collaborations with Sri Lanka and Russia.

India Waives Local Clinical Trials for New Drugs

Indian government has waived the requirement for local clinical trials for certain new drugs, allowing faster access to medicines approved by regulatory authorities in countries like the US, UK and EU. This move aims to expedite the availability of treatments for conditions such as cancer, rare diseases and auto immune disorders. The exemption applies to specific drugs, including those for pandemics, rare diseases and special defence purposes, under certain conditions. While this decision will reduce costs for public healthcare schemes and speed up drug availability, final phase four trials will still be required.

Govt. Announces Rashtriya Vigyan Puraskar to Honour Science and Technology Achievements

The Government of India has announced the recipients of the Rashtriya Vigyan Puraskar, a prestigious award recognising outstanding contributions in science, technology, and innovation. This honour celebrates the achievements of individuals and teams across various scientific fields. The ISRO-Chandrayaan-3 team have been chosen for the Vigyan Team Award for their remarkable contributions to space science, highlighting India's growing prominence in the global space sector. Professor G. Padmanabhan, former Director of the Indian Institute of Science, has been chosen for the Vigyan Ratna Award for his lifetime achievements in biological sciences. The Vigyan Shri Award will be presented to Shri Anandharamakrishnan C, Shri Umesh Varshney, Shri Bhim Singh, Shri Adimurthi Adi, Shri Syed Wajid Ahmad Naqvi, Shri Sanjay Behari and Shri Rahul Mukherjee for their exceptional work in various scientific disciplines. Promising young scientists Dr. Bappi Paul, Dr. Abhilash, Ms. Radha Krishnan Mahalakshmi, Ms. Purabi Saikia, Shri Digendranath Swain, Shri Prabhu Rajagopal and Shri Prashant Kumar will receive the Vigyan Yuva Award.

India and New Zealand Ink Customs Cooperation Deal to Boost Trade

India and New Zealand signed a customs cooperation arrangement to facilitate smoother trade between the two nations during President Smt. Droupadi Murmu's visit to Wellington. The agreement, formalised after bilateral talks with New Zealand's Prime Minister Mr. Christopher Luxon and Deputy Prime Minister Mr. Winston Peters, aims to streamline trade processes and enhance economic ties. In addition to the customs deal, New Zealand ratified its membership in the International Solar Alliance, paving the way for collaborative research in renewable energy. The two countries also agreed

to share best practices in traditional medicine through India's Global Centre for Traditional Medicine in Jamnagar. The discussions concluded on a positive note, underscoring the growing cooperation between India and New Zealand.

Nobel Laureate Muhammad Yunus Takes Charge of Bangladesh's Caretaker Government

Bangladesh's Nobel Peace Prize-winning economist, Mr. Muhammad Yunus, has been sworn in as the head of the caretaker government, three days after Prime Minister Ms. Sheikh Hasina was forced to step down and leave the country following widespread protests. Mr. Muhammad Yunus, 84, was chosen by student protesters to serve as the chief adviser in the interim government, tasked with overseeing new elections in the nation of 170 million. The students' movement was sparked by protests over job quotas and deteriorated economic conditions, leading to a violent crackdown that drew international criticism.

US Elections: Ms. Kamala Harris Picks Mr. Tim Walz as Running Mate

US Vice President Ms. Kamala Harris has announced her running mate, Minnesota Governor Mr. Tim Walz. Mr. Walz, a former educator and two-term governor, brings experience as a former congressman and current chair of the Democratic Governors Association. The Harris-Walz campaign has already raised over USD 10 million, marking one of the campaign's best fund raising days. The duo's joint appearance comes after President Mr. Joe Biden stepped down from the race, leaving Ms. Harris to lead the Democratic ticket.

RBI Raises UPI Payment Limit to Rs. 5 Lakh

The Reserve Bank of India (RBI) has increased the Unified Payments Interface (UPI) transaction limit from Rs. 1 lakh to Rs. 5 lakh, providing significant relief to users. Announced by RBI Governor, Shri Shaktikanta Das following the bimonthly Monetary Policy Committee meeting, the move aims to accommodate higher-value transactions in sectors like capital markets, IPO subscriptions, loan recovery, insurance and education. The RBI has noted that UPI has become the preferred payment method in India due to its convenience, with a user base of 42.4 crore. This increase in the transaction limit reflects the growing demand for higher-value payments through UPI. The RBI also plans to introduce 'Delegated Payments' in UPI, further expanding the reach of digital payments across the country. UPI transactions have shown robust growth, with the total transaction value exceeding Rs. 20 trillion for the third consecutive month.

India's Lifestyle Market to Reach USD 210 Billion by 2028: Market Research

India's lifestyle market is set to grow to USD 210 billion by 2028, driven by a 10-12% Compound Annual Growth Rate (CAGR), according to a report by Bain & Company and Myntra. The fashion sector, which makes up 80% of the market, will be the main contributor, with beauty and personal care (BPC) also seeing similar growth rates. The report highlights that India's e-lifestyle market is projected to expand from USD 16-17 billion in 2023 to USD 40-45 billion by 2028, with online penetration expected to rise from 13% to 22%. This growth will be fueled by rising incomes, a growing Gen-Z shopper base and increasing demand for organised and branded products. India remains a key market for global brands, with 90% of the top 50 brands already operating in the country. Over 60 new global brands have entered or plan to enter the Indian market within the past year, reflecting confidence in the country's expanding lifestyle sector.
